IN ONE PARAGRAPH

Dr. Arun Dental Care is a dental clinic in Kuppam serving patients across several languages and every kind of device. We gave the clinic a premium, trustworthy online presence **and** replaced paper registers with a private admin console. Patients book an OP online and instantly get an OP number. The doctor gets an email alert, and the front desk manages status, sittings, fees, records and examination forms from one screen.

PROJECT OVERVIEW

01

Built around how a clinic actually works

One brief, two products: a public face patients trust, and a private engine that keeps the front desk fast.

The brief

A busy local clinic needed to look as good online as it does in person, make booking effortless for patients who speak different languages, and stop juggling paper registers, phone notes and separate payment books.

Who it serves

Patients & families: discover, trust, book and get confirmation in their language.

Dr. Arun: instant new-OP alerts and complete digital records.

Front-desk staff: one dashboard for the day's queue, fees and follow-ups.

Project goals

01

Earn trust in seconds

Premium, calm, medical-grade design with real clinic photography.

02

Make booking effortless

A short OP form, an instant OP number and a WhatsApp confirmation.

03

Speak every patient's language

English, Telugu, Tamil and Kannada, switchable on every page.

04

Run the clinic from one screen

Appointments, patients, fees and exam forms without paperwork.

What was delivered

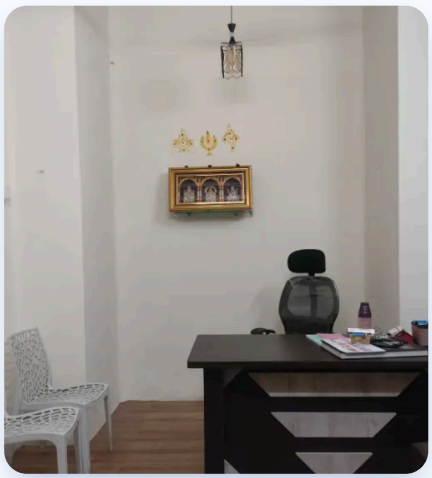

Public website

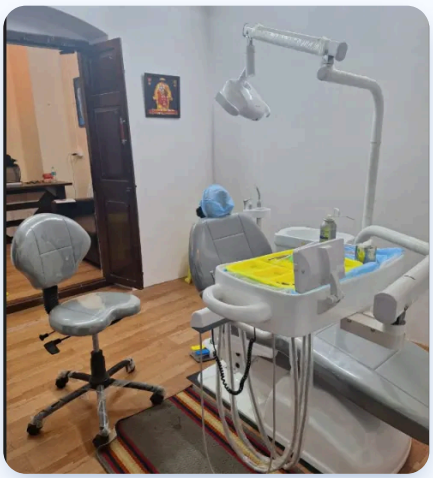

- Home, About, Services, Gallery and Contact pages
- Online OP booking with printable OP slip
- Four-language interface with a language switcher
- Live "open now" status, click-to-call and WhatsApp
- Search-friendly page titles and descriptions

Clinic admin platform

- Secure login and a live command-centre dashboard
- Appointment pipeline with sitting counter
- Fee, payment and dues tracking per OP
- Patient records with Excel-ready export
- Digital examination form with tooth chart, photos and PDF

BRAND & DESIGN LANGUAGE

02

Premium blue, calm white, clinical clarity

Every screen speaks one visual language, so the clinic looks established from the very first tap.

The clinic mark

The clinic's own emblem is used in the header, footer, admin console and printed forms, always as a clean circle.

Colour palette

Primary	Deep blue	Accent glow
#1677FF	#0B3A82	#8CCBFF

Soft blue	Pale blue	Ink
#EAF4FF	#F6FAFF	#12233F

HEADINGS · PLAYFAIR DISPLAY

Aa

Healthy Teeth. Confident Smiles.

BODY & UI · PLUS JAKARTA SANS

Aa

Clear, friendly and easy to read on any screen.

Design principles

A

Calm, not clinical

Generous white space and soft depth, so a dental visit feels reassuring.

B

Motion with purpose

Gentle reveals, count-ups and a live pulse, all switched off for people who prefer reduced motion.

C

One system, everywhere

Shared tokens keep buttons, cards, badges and forms identical across the site and admin.

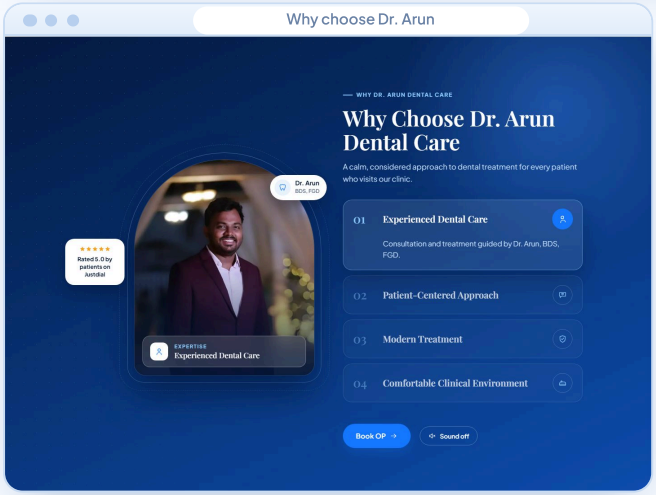

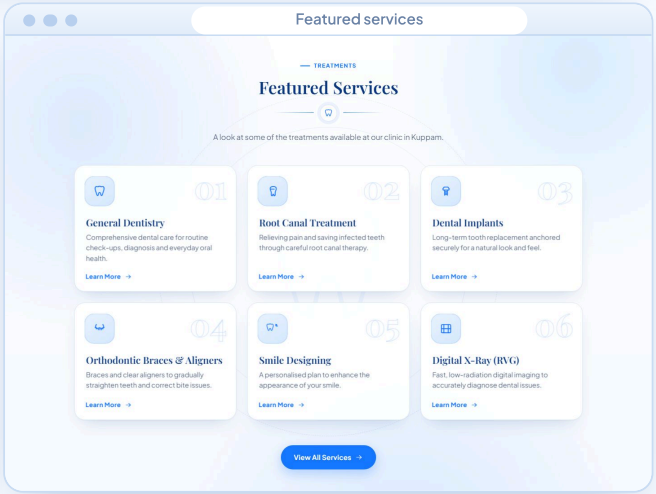

THE PUBLIC WEBSITE · HOME

03 A first impression that earns trust

The home page moves visitors from "who is this clinic?" to "book an OP" in a single calm scroll.

Animated hero
3D tooth visual with floating benefit chips and a clear Book OP button.

Trust marquee
Rating, doctor credentials, location and hours in a live ticker.

Why choose us
Interactive four-point section beside a portrait of the doctor.

Featured services
Six treatment cards linking through to the full services page.

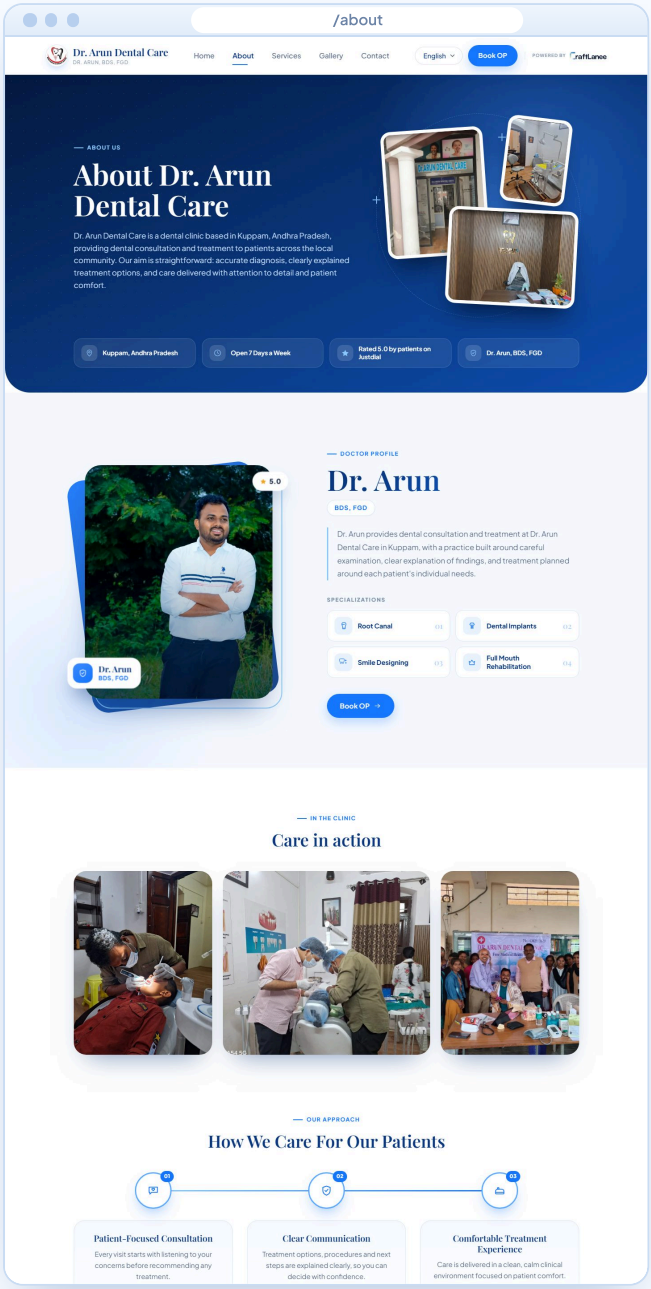

Doctor spotlight
Editorial quote, credentials and a stamp-style clinic badge.

Conversion banner
A closing call to action and a sticky path to booking.

THE PUBLIC WEBSITE · ABOUT & SERVICES

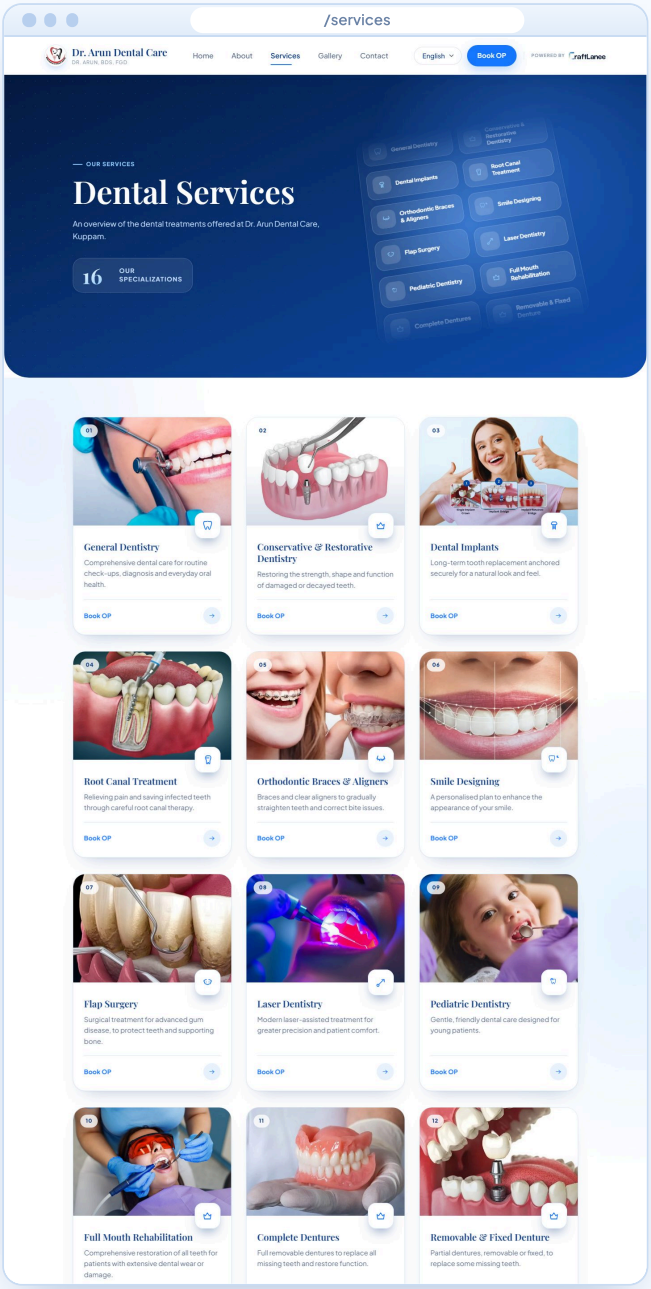

03 Credibility, then clarity

ABOUT

- Doctor profile with credentials and rating
- Real clinic photos: storefront, chairs, camps
- Three-step "how we care" approach

SERVICES

- 16 specialisations, each with its own photo
- Numbered cards with icon and direct Book OP
- Mirrors the clinic's own signage board exactly

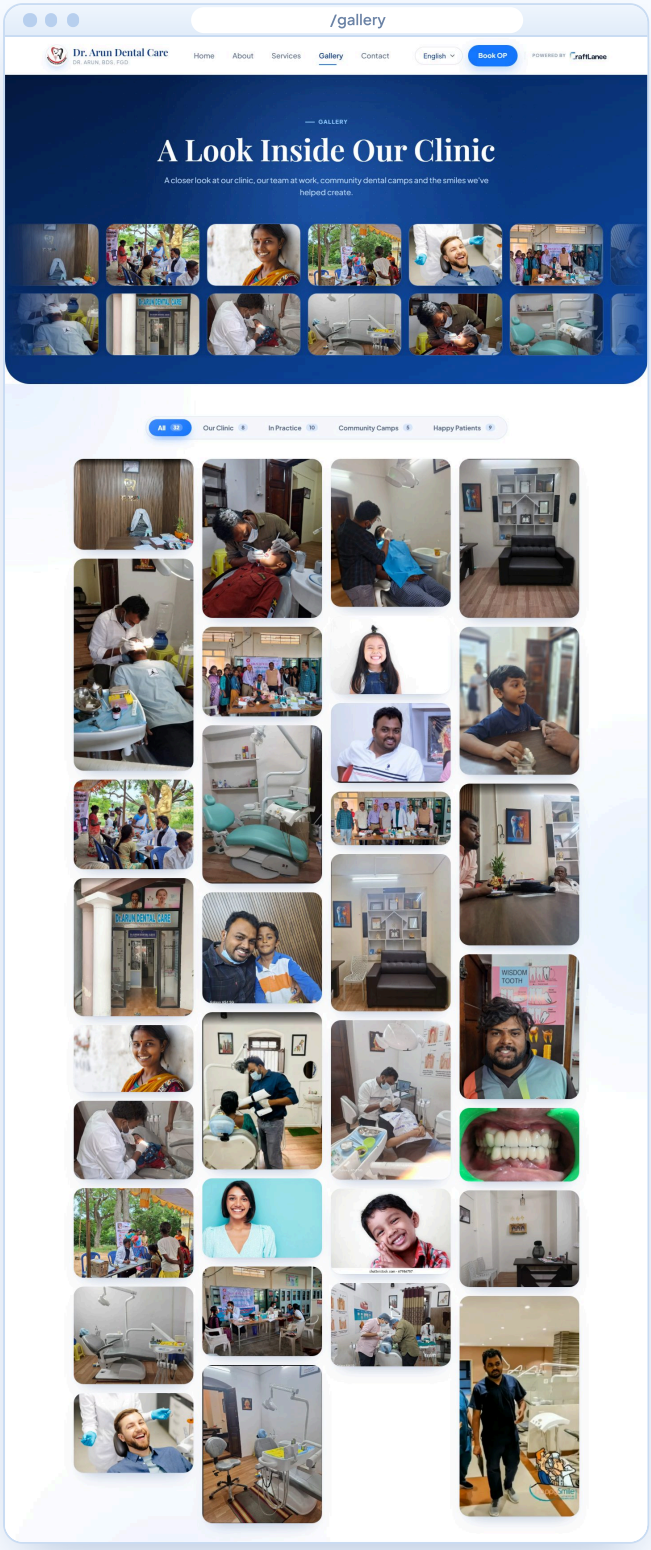

Every specialisation the clinic offers

- General Dentistry
- Conservative & Restorative
- Dental Implants
- Root Canal Treatment
- Braces & Aligners
- Smile Designing
- Flap Surgery
- Laser Dentistry
- Pediatric Dentistry
- Full Mouth Rehabilitation
- Complete Dentures
- Removable & Fixed Denture
- Digital X-Ray (RVG)
- Teeth Bleaching
- Oral Pathology & Diagnosis
- Oral Medicine & Radiology

THE PUBLIC WEBSITE · GALLERY & CONTACT

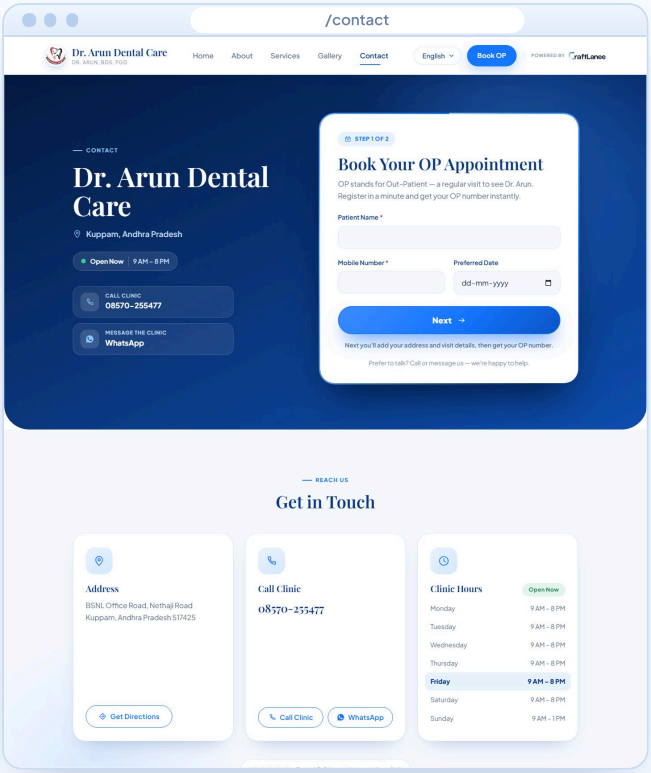

03 Proof, then a way to reach the clinic

GALLERY

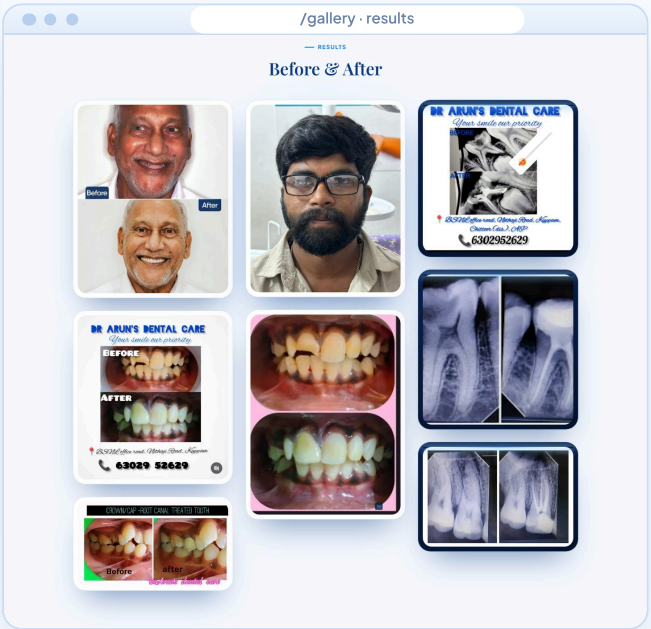

- 32 real photos in a masonry layout
- Filters: Clinic · In Practice · Camps · Happy Patients
- Before & after results in a dedicated section

CONTACT

- Direct call button, with a separate WhatsApp line
- Live open-now status from today's clinic hours
- Address, directions and weekly hours at a glance

BEFORE & AFTER RESULTS

THE PATIENT BOOKING JOURNEY

04 From "I need a dentist" to an OP number in under a minute

1

Fill a short form

Name, mobile, address, occupation and preferred date. Everything else is optional.

2

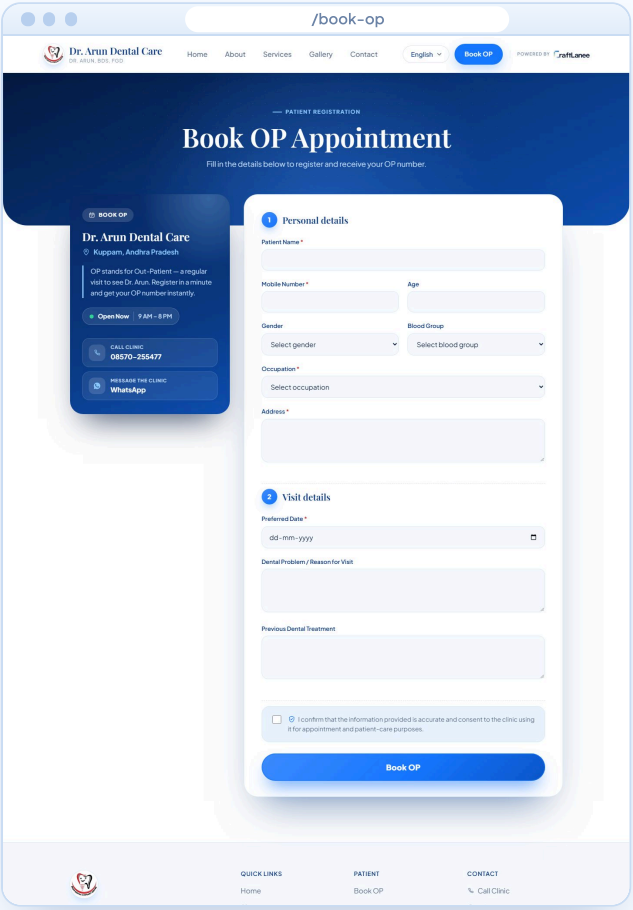

Get an OP number

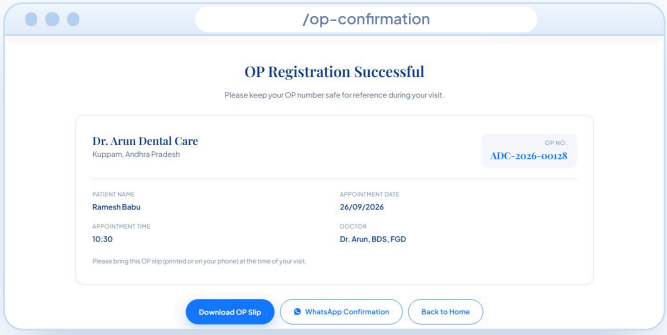

A unique, sequential number appears instantly, with a printable slip.

3

Clinic is alerted

The doctor receives an email at once, and the front desk sees it live in the dashboard.

New OP Registration

Email to Dr. Arun · sent automatically

New OP Registration | ADC-2026-000128 | Ramesh Babu | 26 Sep 2026

OP number	**ADC-2026-000128**
Patient	**Ramesh Babu · 42 · Male**
Mobile	**98480 12345**
Occupation	**Farmer**
Visit	**26 Sep 2026 · 10:30**
Problem	**Severe toothache, lower right**

Built-in safeguards

- Indian mobile-number validation
- Age, length and required-field checks on the server
- Consent tick-box before submitting
- Rate-limited to stop spam submissions

WhatsApp

The patient can send a ready-made confirmation message to the clinic in one tap.

Download slip

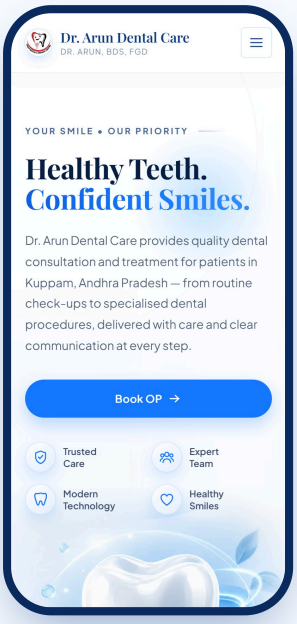

A clean printable OP slip to bring on the day of the visit.

Unique OP numbers

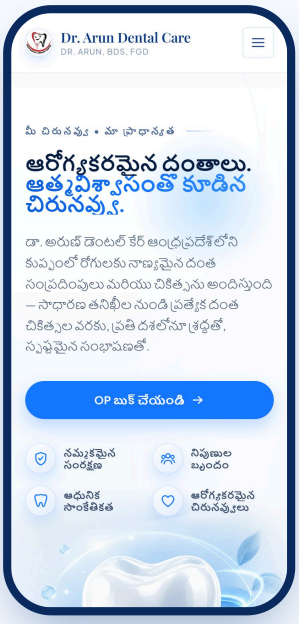

Numbers follow **ADC-2026-000123** and reset each year. Each is reserved atomically in the database, so two patients can never receive the same one, even at the same second.

MULTILINGUAL & MOBILE-FIRST

05 Every patient, in their own language, on their own phone

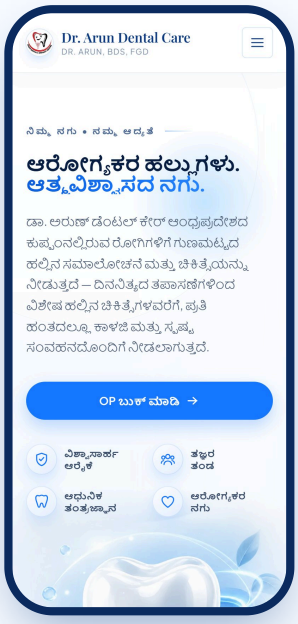

English

తెలుగు

தமிழ்

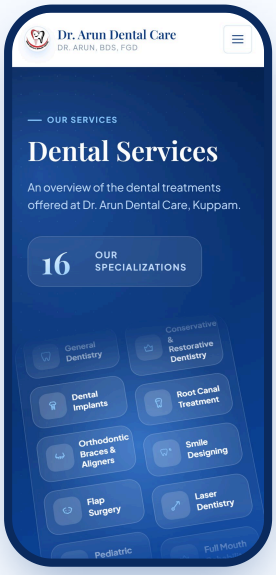

ಕನ್ನಡ

Four languages, one switch

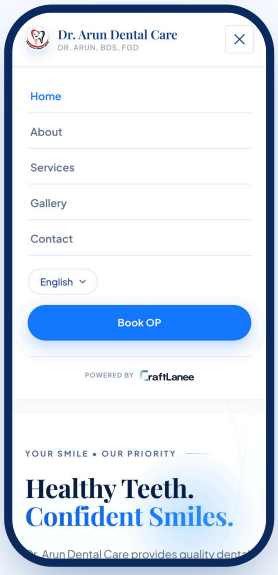

- Language switcher in the header on every page
- The choice is remembered on the visitor's device
- All copy lives in one file per language, easy to review with a native speaker
- Long scripts were tested so buttons and labels never clip or overflow

Designed for phones first

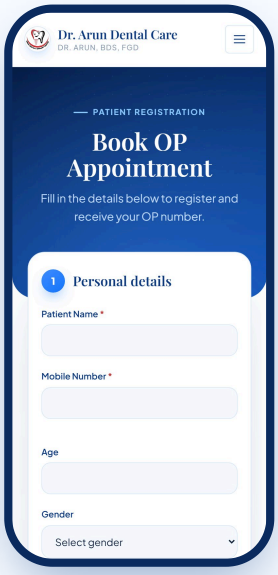

- Layouts verified from 280 px phones up to widescreen
- Thumb-friendly menu, buttons and forms
- Click-to-call and WhatsApp built into the page
- No horizontal scrolling at any size

Navigation

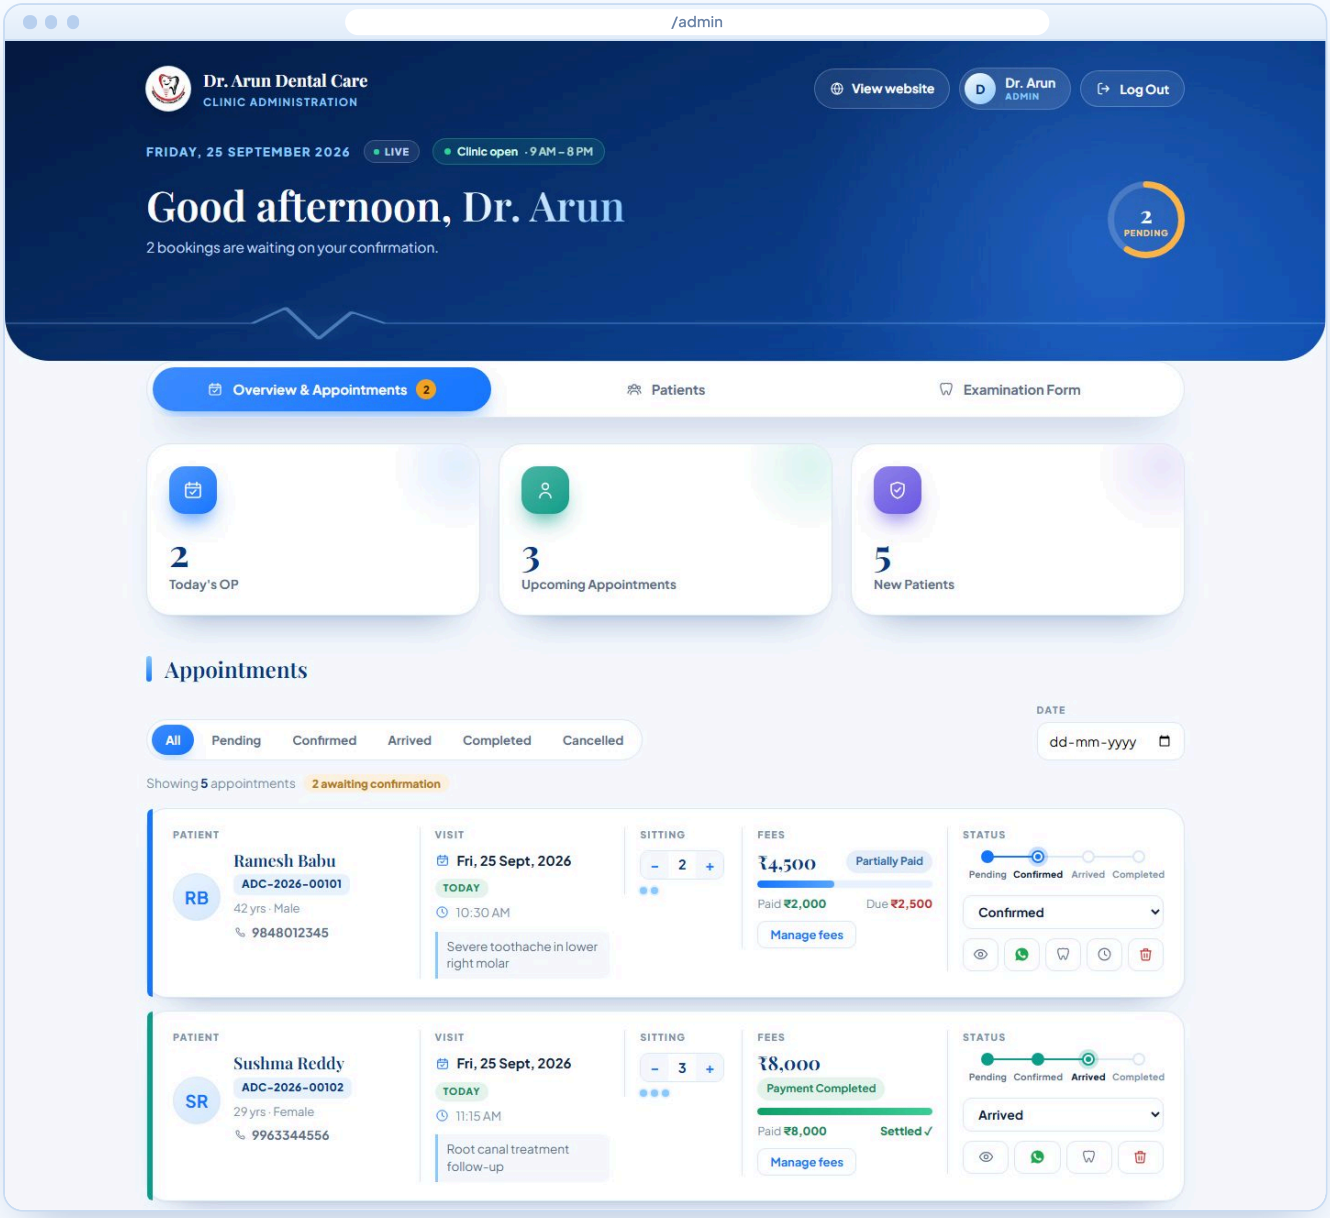

Book OP

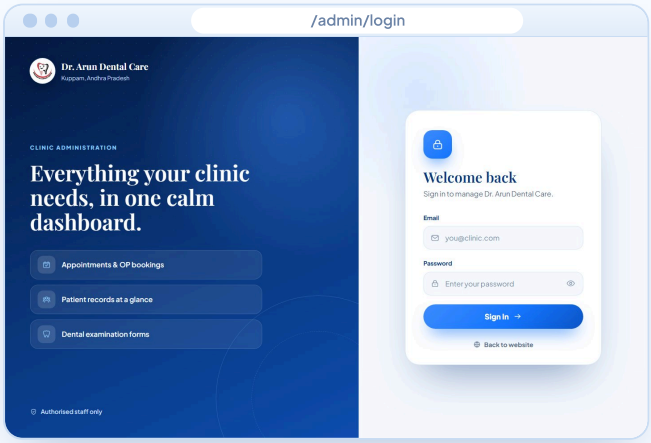

Contact

THE CLINIC ADMIN PLATFORM · COMMAND CENTRE

06 One screen that tells the front desk what matters today

SECURE SIGN-IN

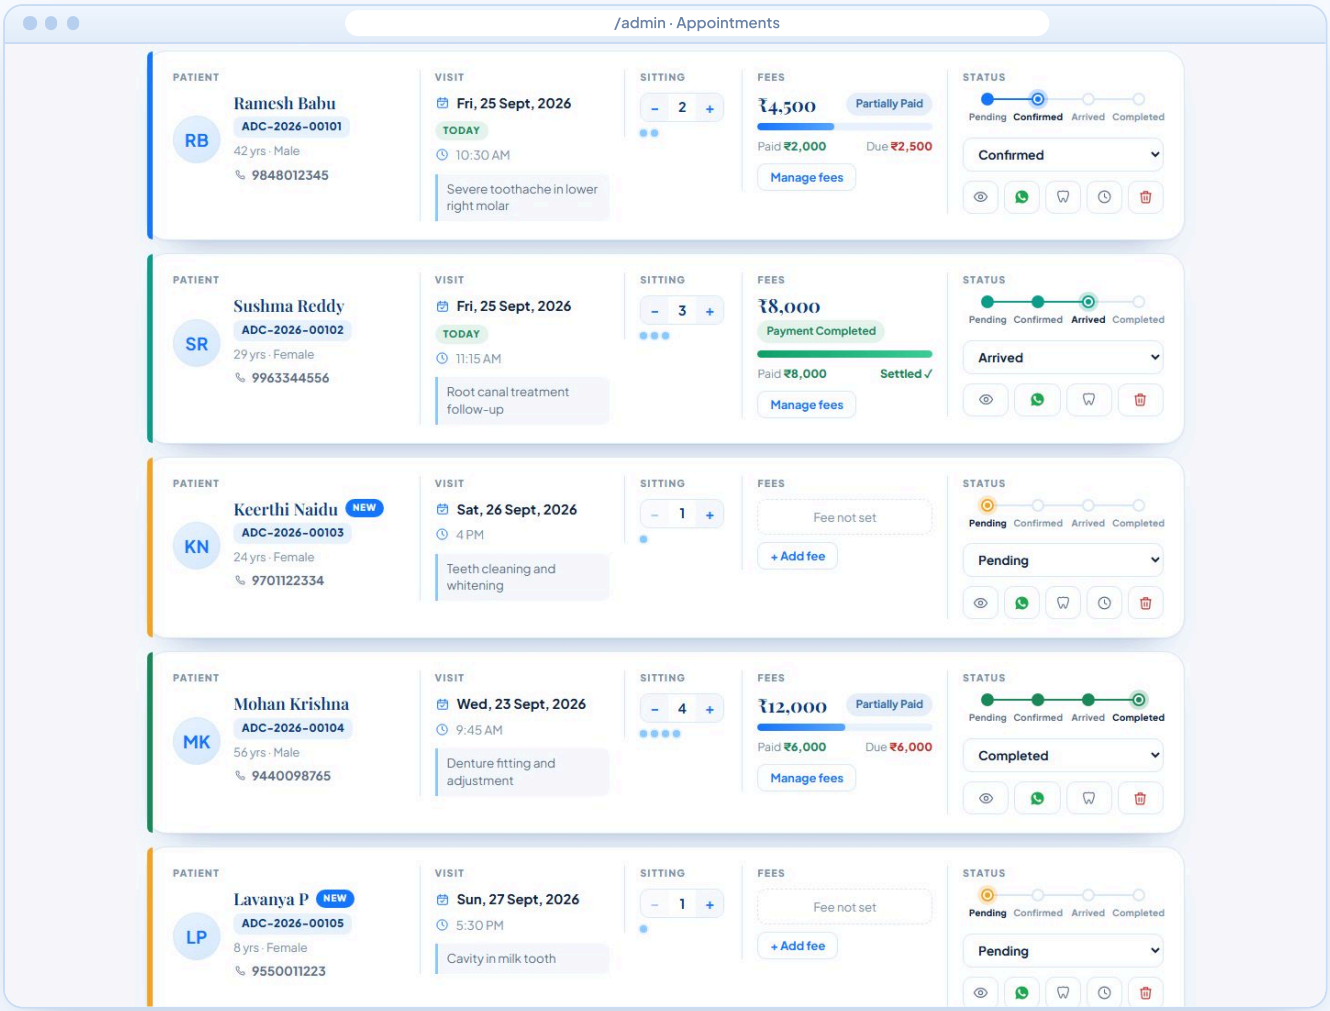

What the header does for you

- **Live badge** and 15–second auto-refresh: new bookings appear with an alert
- **Clinic open / closed** status with today's hours
- **Pending dial** that glows amber when patients await confirmation
- Today's OP, upcoming and new-patient counters that count up
- Private sign-in: hashed passwords, protected routes, login rate-limiting

06

THE CLINIC ADMIN PLATFORM · APPOINTMENTS

Every visit, from booking to final payment

1

Status pipeline

Pending, Confirmed, Arrived, Completed, Cancelled, shown as a progress track and changed from a dropdown.

2

Sitting counter

Track multi-visit treatments such as root canals with one tap.

3

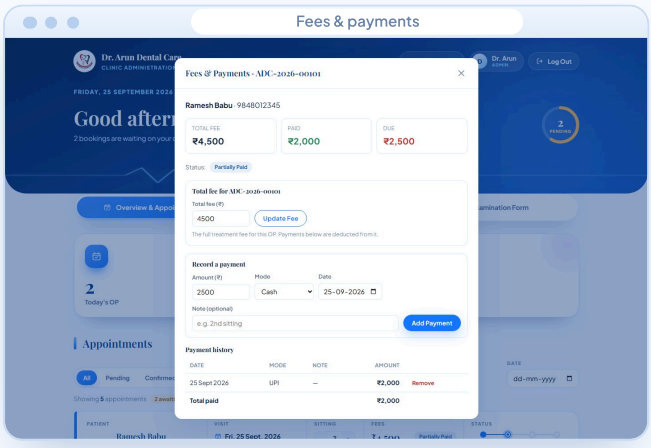

Fee meter

Total fee, paid, due and a payment status pill on every card.

4

Quick actions

View details, WhatsApp confirmation, open the exam form, reschedule or delete.

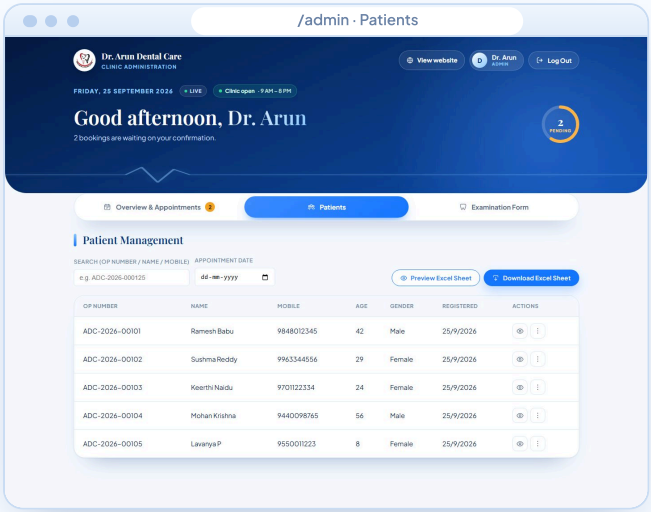

Fees & payments, done properly

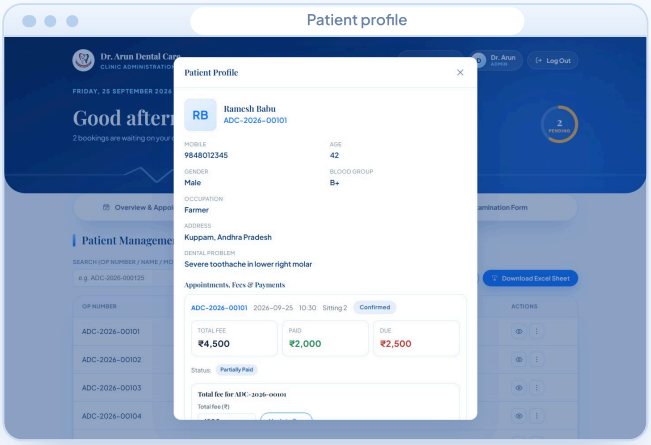

- Set the total fee once per OP
- Record part-payments across sittings (Cash, UPI, Card, Bank transfer)
- Due amount and status update automatically
- Full payment history with the option to remove a mistaken entry

THE CLINIC ADMIN PLATFORM · RECORDS & EXAMINATION

06 Patient files and clinical forms, without the paperwork

PATIENT MANAGEMENT

Instant search

By name, mobile number or OP number.

Excel download

Every patient with status, visits and fees in one click.

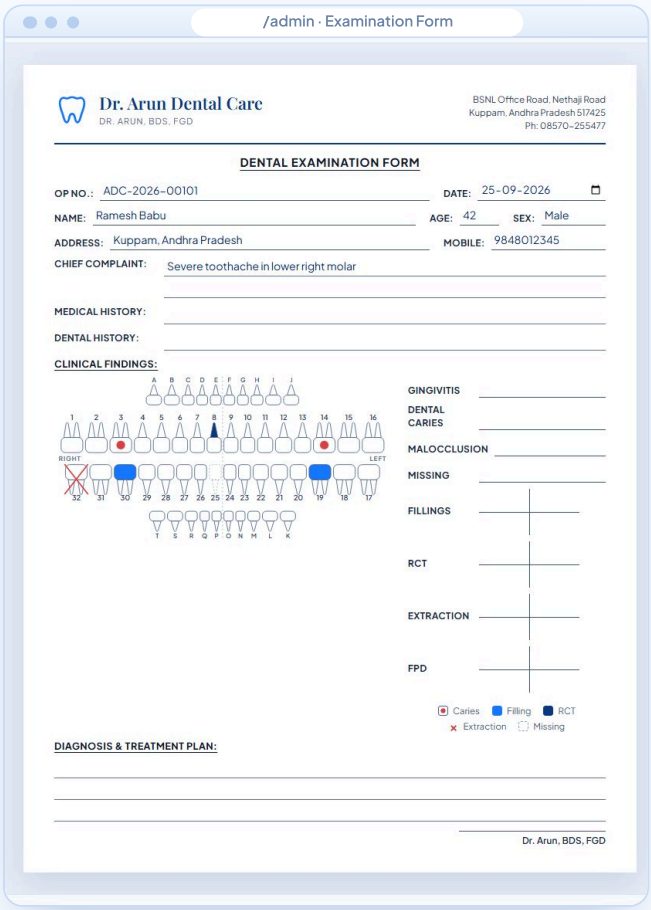

Full profile

Every visit, sitting and payment in one place.

Safe delete

Removes a patient and their records together, or not at all.

DIGITAL EXAMINATION FORM

Chair-side clinical record

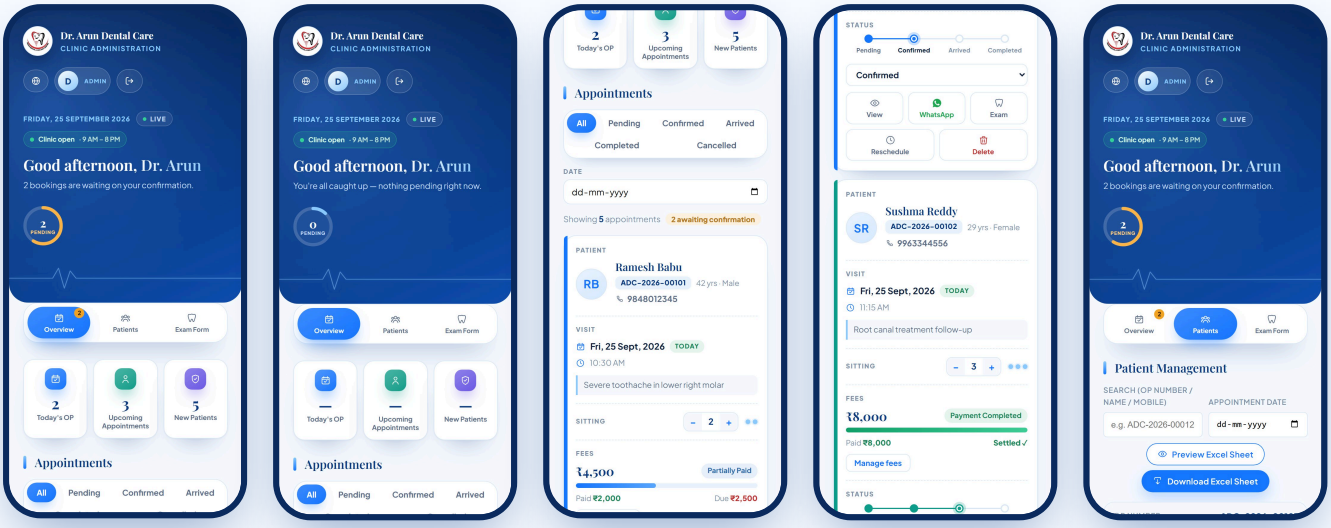

- Auto-fills from a registered patient
- Interactive tooth chart: caries, filling, RCT, extraction, missing
- Optional patient photos: upload, or capture with the camera
- Save as a print-ready A4 PDF, with photos on page two
- Drafts are kept safely on the device while typing

THE CLINIC ADMIN PLATFORM · ON THE PHONE

06

The whole console, in the doctor's pocket

Tables become touch-friendly cards, and the tab bar adapts to any screen width.

Sign in · Dashboard · Appointments · Fees & actions · Patients

Card layout

Appointments reflow from a five-column row on desktop to a stacked card on phones. No sideways scrolling.

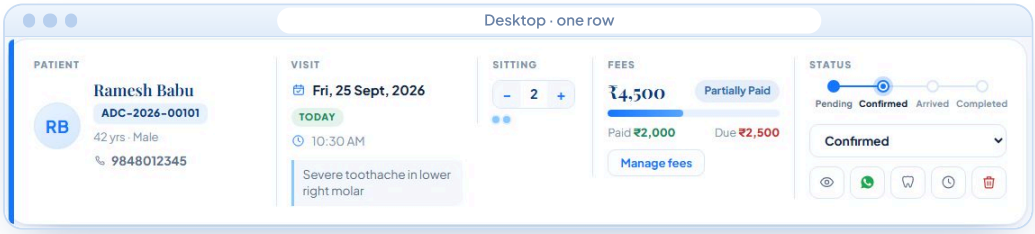

Adaptive tab bar

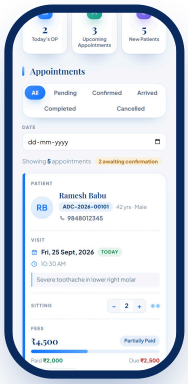

Full labels on large screens, compact icon-and-label tabs on phones, down to 280 px.

Touch-first controls

Large tap targets for status, sittings, WhatsApp and fees, built for use between patients.

The same appointment, two layouts

Screen widths checked

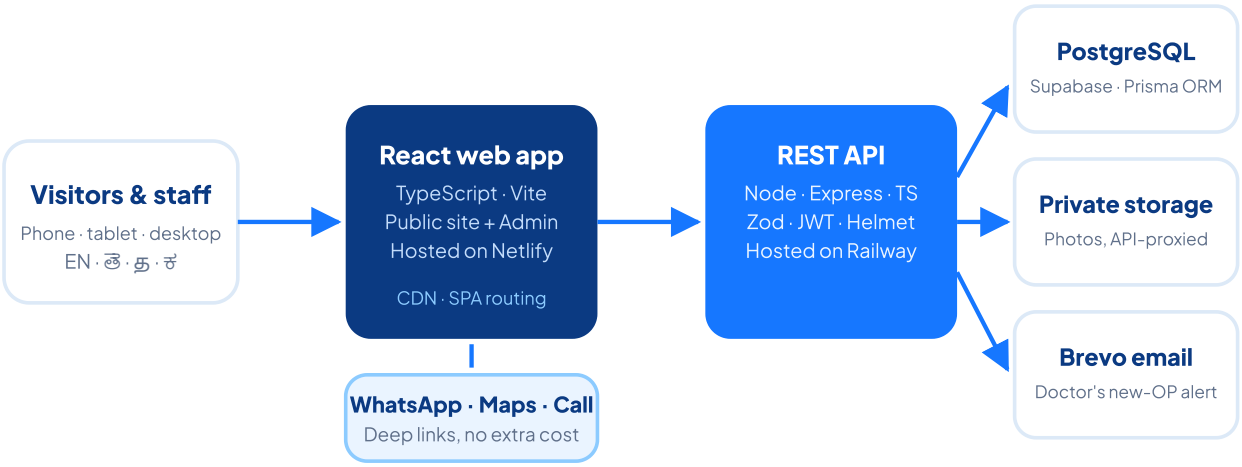

280 px	Small phone	320 px	Compact phone
360 px	Android	390 px	iPhone
430 px	Large phone	768 px	Tablet
1024 px	Laptop	1440 px	Desktop

TECHNOLOGY & ARCHITECTURE

07

Modern, maintainable and fast

A typed React front end talks to a small, secure API and a managed PostgreSQL database.

What happens when a patient books

1. **Submit** — The web app sends the booking over HTTPS.
2. **Validate** — The API checks every field and rate-limits abuse.
3. **Number** — An OP number is reserved atomically.
4. **Save** — Patient and appointment are stored in PostgreSQL.
5. **Notify** — The doctor is emailed and the dashboard updates live.

Front end

React 18 · TypeScript · Vite · React Router · react-i18next · plain CSS Modules · jsPDF for PDF export

Back end

Node.js · Express · TypeScript · Prisma ORM · Zod validation · JWT with bcrypt · Multer uploads

Data & services

PostgreSQL on Supabase · private file storage · Brevo transactional email · WhatsApp and Google Maps links

Quality

Strict TypeScript across both apps · responsive checks from 280 px to widescreen · automated browser walkthroughs of key flows

Single source of truth: clinic name, phone, WhatsApp, address and weekly hours live in **one configuration file**. Change it once and every page, the footer, the OP slip and the live open/closed status all update together.

08

SECURITY & DATA MODEL

Patient data is treated like patient data

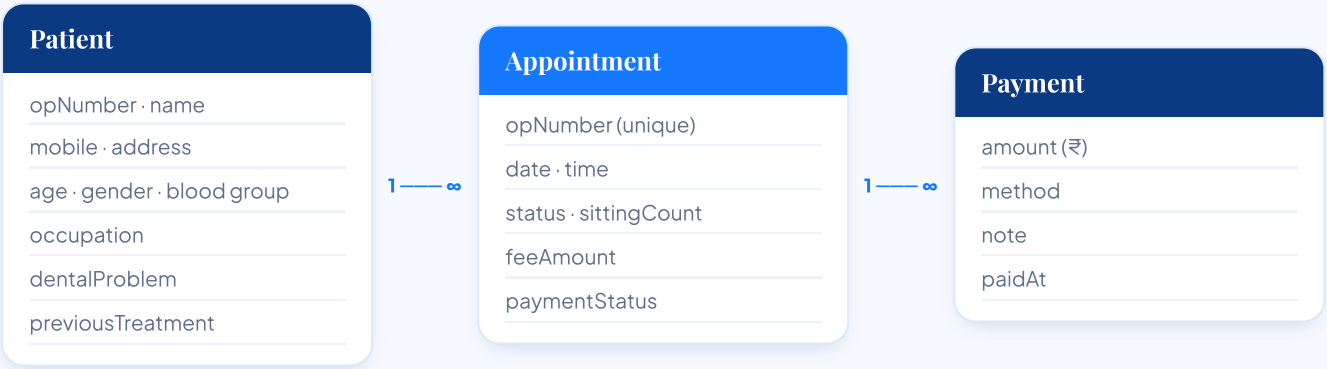

Security measures

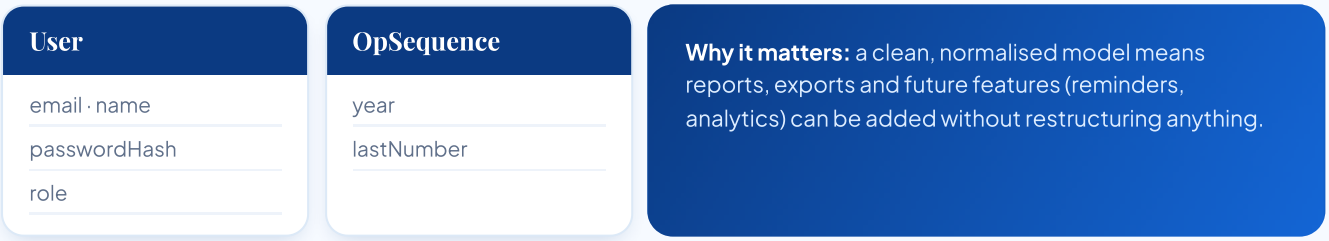

- Passwords stored as bcrypt hashes, never in plain text
- Sessions use an **httpOnly** signed token, unreadable by page scripts
- Every admin route sits behind authentication middleware
- Login limited to 10 attempts / 15 min; public forms to 20 / 15 min
- Secure HTTP headers (Helmet) and a strict CORS allow-list
- Server-side validation (Zod) of every input
- Patient photos live in private storage and are only served through the authenticated API

Reliability

- Atomic OP-number generation, with a database-level unique constraint as a backstop
- Multi-step deletes run in a single transaction: all or nothing
- Fees derived from payments, so totals can never drift
- Non-blocking doctor email: a mail hiccup never blocks a booking
- Live dashboard polling with graceful fallbacks when offline

Data model

Why it matters: a clean, normalised model means reports, exports and future features (reminders, analytics) can be added without restructuring anything.

What the Excel export contains

OP number · Name · Mobile · Age · Gender · Blood group · Occupation · Address · Dental problem · Previous treatment · Status · Visit date · Sittings · Payment status · Total fee · Paid · Due

DELIVERY & HANDOVER

09 Ready for the clinic, ready for the next feature

Delivered

- Public website in four languages
- Online OP booking and printable OP slip
- Admin console: appointments, patients, fees, exam forms
- Excel-ready patient export
- Doctor email alerts and WhatsApp confirmations
- Production deployment with database migrations

Easy to maintain

- Contact details and hours edited in one place
- Services list driven by a single data file
- Translations live in plain JSON files
- Database changes tracked by versioned migrations
- Clean, typed code that any developer can pick up

Growth path

→

Appointment reminders

Automatic SMS or WhatsApp nudges before a visit to cut no-shows.

→

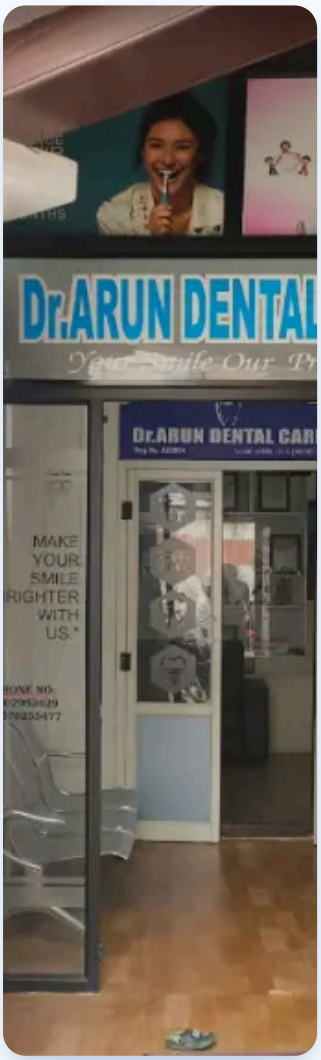

Reports & analytics

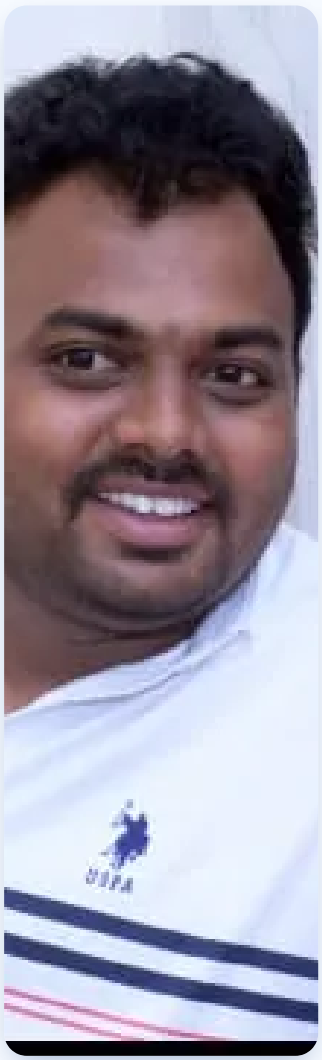

Daily collections, busiest days and treatment mix from data already captured.

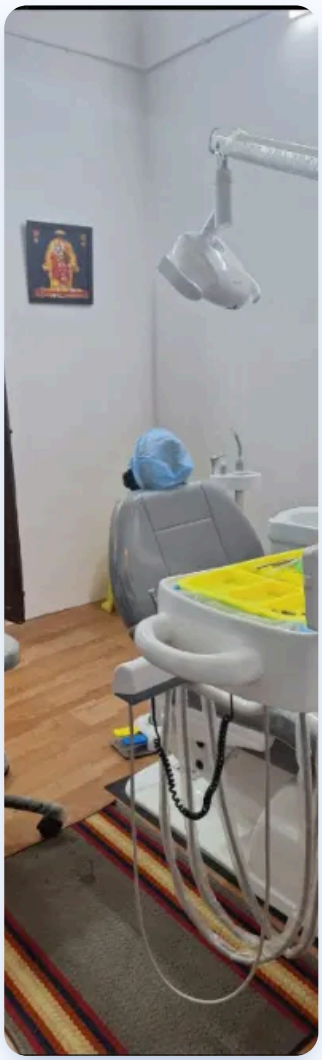

→

Online payments

UPI payment links tied to each OP's due amount.
