CraftLanee

PROJECT SHOWCASE

Salon Billing & *Management* System

A complete point-of-sale and back-office platform for a busy unisex salon. It covers GST-ready billing, memberships and prepaid wallets, staff performance, inventory, expenses, jewellery rental and business reports, all in one place.

CLIENT
Priya UNISEX Beauty Care

INDUSTRY
Salon & Beauty

PLATFORM
Web app · Any device

BUILT BY

PROJECT OVERVIEW

One system that runs the whole salon

Priya UNISEX Beauty Care needed more than a billing app. The team wanted one reliable tool for the front desk and the owner: fast checkout at the counter, correct GST invoices, loyal-customer programmes, and a clear view of how the business is doing.

14	240+	2	9
Integrated business modules	Real salon services pre-loaded with prices	Secure roles: Owner & Staff	Report types with date filters & export

The challenge

- Handwritten or spreadsheet bills that were slow and easy to get wrong
- GST worked out by hand, invoices not in a standard format
- No record of which stylist did which service or how much they brought in
- Memberships, prepaid balances and jewellery rentals tracked on paper
- No clear daily or monthly picture of sales and expenses

What we delivered

- A touch-friendly POS screen that builds a full bill in seconds
- Automatic CGST/SGST/IGST with branded, printable, shareable invoices
- Each service on a bill credited to the staff member who did it
- Membership pricing, prepaid wallets and a full jewellery rental workflow
- Live dashboards and exportable reports for every part of the business

01 **Highlights & roles** What makes it different, who uses it

02 **Front desk** Billing, invoices, customers, check-in, appointments

03 **Business operations** Memberships, services, staff, inventory, expenses, jewellery

04 **Insights & compliance** Dashboards, reports, GST, settings

05 **Technology & security** Architecture, stack, data protection

01 · HIGHLIGHTS

Built around how a salon actually works

POS-speed billing
Search a customer, tap services, assign a stylist and take payment on one screen.

GST-ready invoices
Tax rate is configurable, never hardcoded. Supports intra- and inter-state GST with sequential invoice numbers.

Memberships & wallets
Discount cards unlock member prices per service, and prepaid wallets keep a full transaction history.

Staff performance
Revenue, services and bills per employee, with charts and date filters.

Jewellery rental
Reserve, rent, return and refund deposits. Deposits are always kept separate from revenue.

Owner insights
Net business amount, low stock, overdue returns and payment mix at a glance.

ROLES & ACCESS

Two roles, each seeing only what it needs

OWNER

Full control of the business

Sees every number and manages pricing, staff, stock, expenses, tax settings and reports. Only the owner can delete bills, customers or employees.

All reports · GST settings · Employees · Inventory · Expenses · Plan pricing · Void / delete

STAFF

Everything for the counter

A focused workspace for daily work. Staff can create bills, add customers, check people in and out, manage appointments and jewellery rentals, and assign memberships.

New bill · Customers · Check-in · Appointments · Jewellery · Services (view)

Enforced on the server, not just hidden in the UI. Every request is checked against the user's role, so staff cannot reach owner data even by calling the system directly.

A CUSTOMER'S VISIT, END TO END

From walk-in to report, entered only once

Each step passes its data to the next. The receptionist enters information once, and it shows up in the invoice, the customer's history, staff performance and the owner's reports.

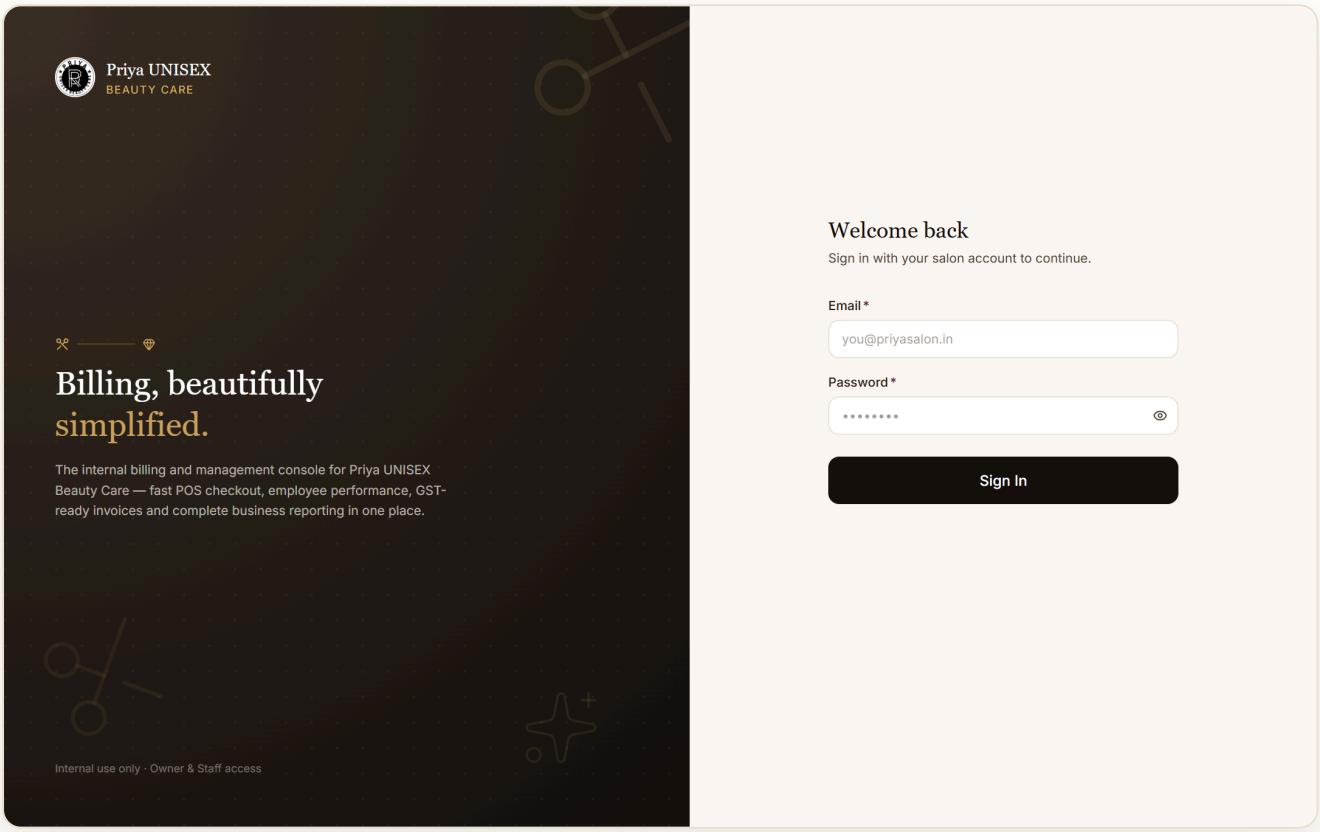

1
Check-in
Customer arrives and is logged with purpose and stylist

2
Build bill
Services tapped in, member prices applied automatically

3
Pay
Cash, UPI, card, wallet, or a partial payment

4
Invoice
Print, download PDF, or share via WhatsApp or email

5
Insights
Sales, GST, staff revenue and reports update right away

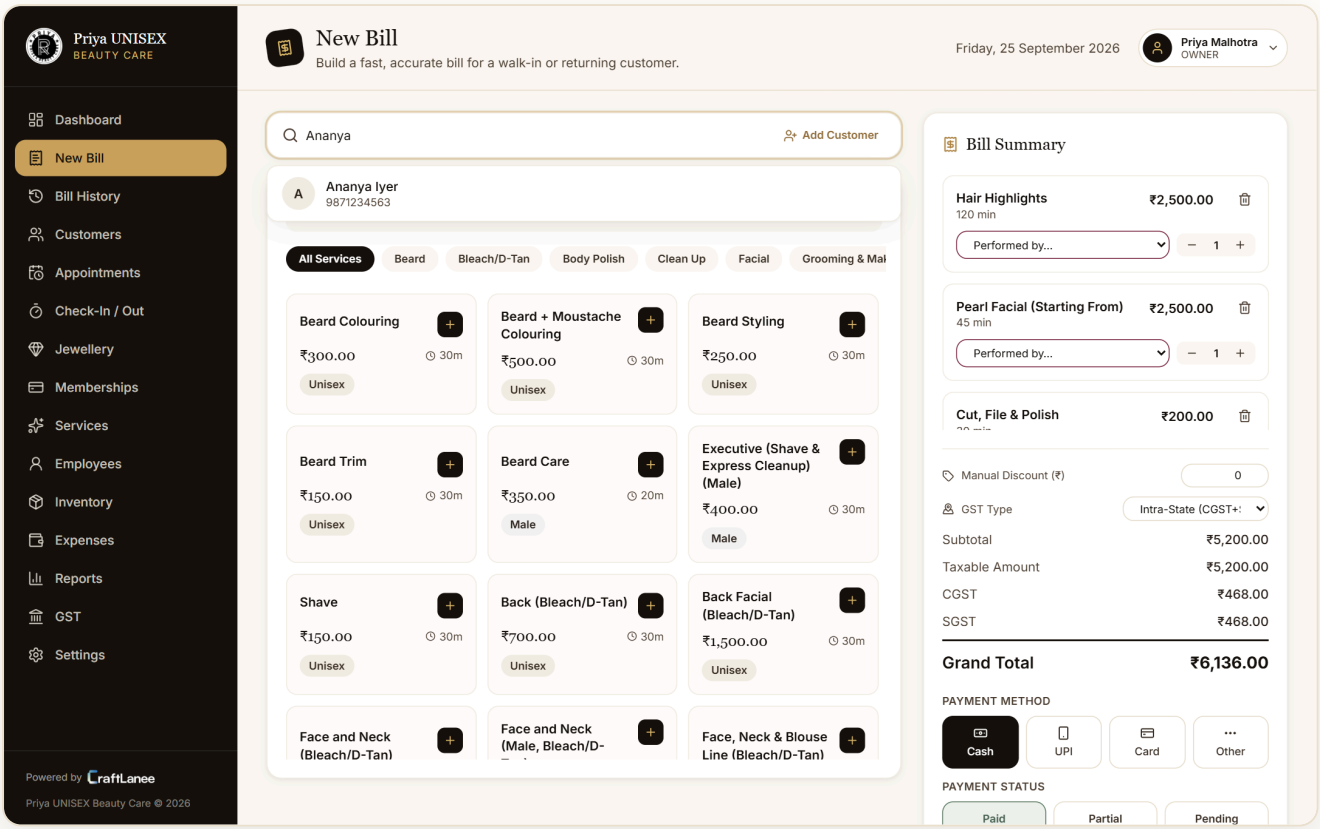

▲ Branded sign-in screen. Each salon gets its own logo, name and colours.

02 · FRONT DESK

New Bill: the POS screen

OWNER + STAFF

▲ Customer search, the service grid and a live bill summary with GST, payment method and payment status.

The main screen of the product, designed for speed at a busy counter. Staff search a returning customer by name or phone, or add a new one without leaving the page. They then tap services from a category grid.

Each line is assigned to the stylist who *performed* it, so performance reports stay accurate even when everyone shares one counter login.

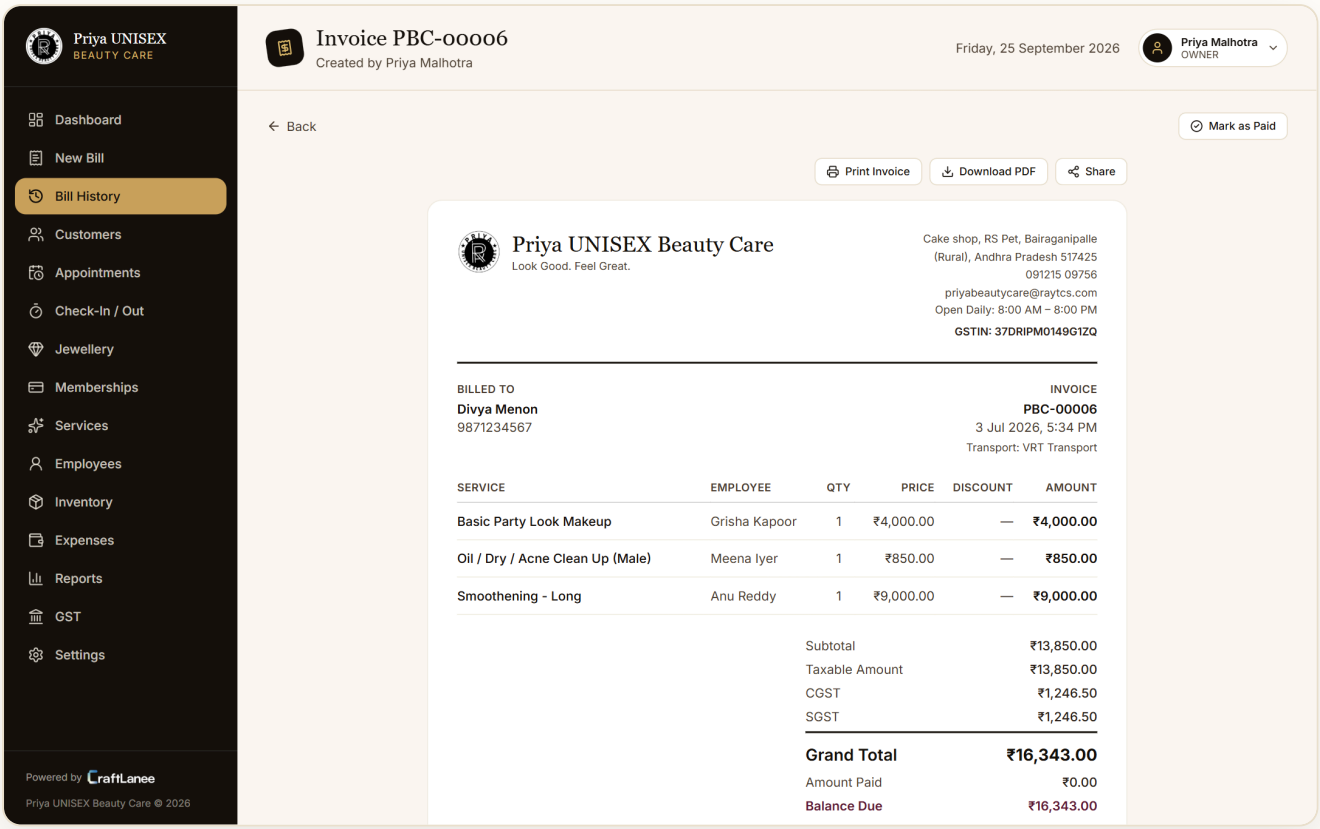

- Live subtotal, discount, taxable amount, CGST/SGST or IGST and grand total
- Member prices applied automatically for customers with an active membership
- Pay by cash, UPI, card, other or prepaid wallet; mark bills as paid, partial or pending
- Booked appointments convert into a pre-filled bill in one click
- Retail and jewellery items can go on the same bill

02 · FRONT DESK

Invoices & bill history

OWNER + STAFF

B

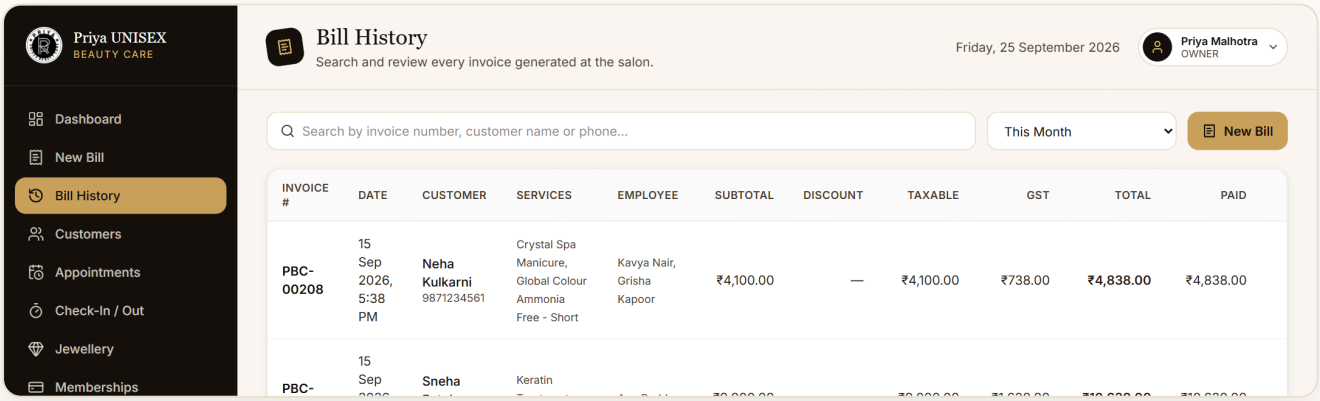

▲ A branded GST tax invoice with salon details, GSTIN, per-line stylist, tax split and balance due.

Professional invoices

Every bill becomes a clean, branded tax invoice with sequential numbering. It can be printed, downloaded as a real PDF, or sent straight to the customer on WhatsApp or email.

Searchable history

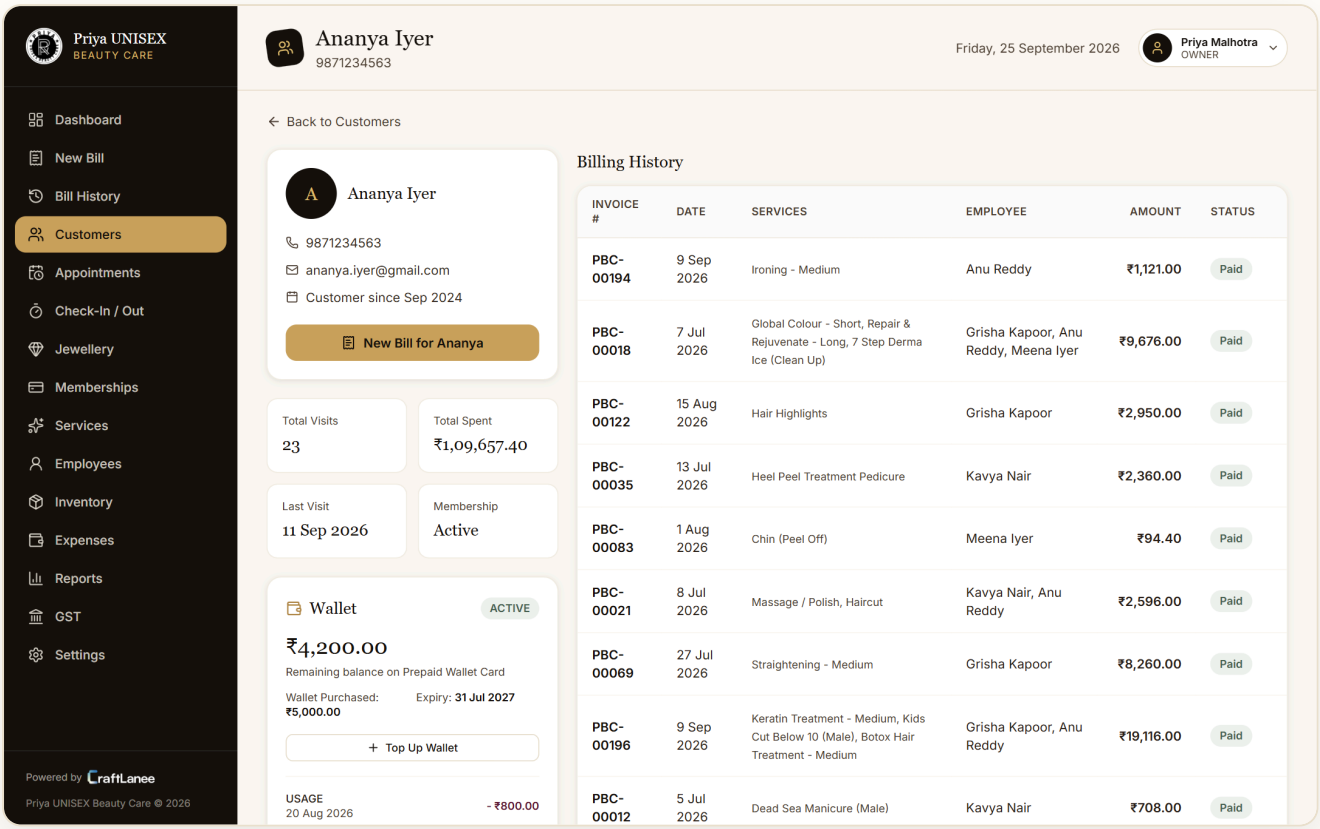

Find any invoice by number, customer or phone, and filter by date range. Partial payments can be marked as paid later. Only the owner can void or delete a bill, which keeps the audit trail intact.

02 · FRONT DESK

Customers & profiles

OWNER + STAFF

▲ Customer profile with visits, lifetime spend, membership status, prepaid wallet ledger and full billing history.

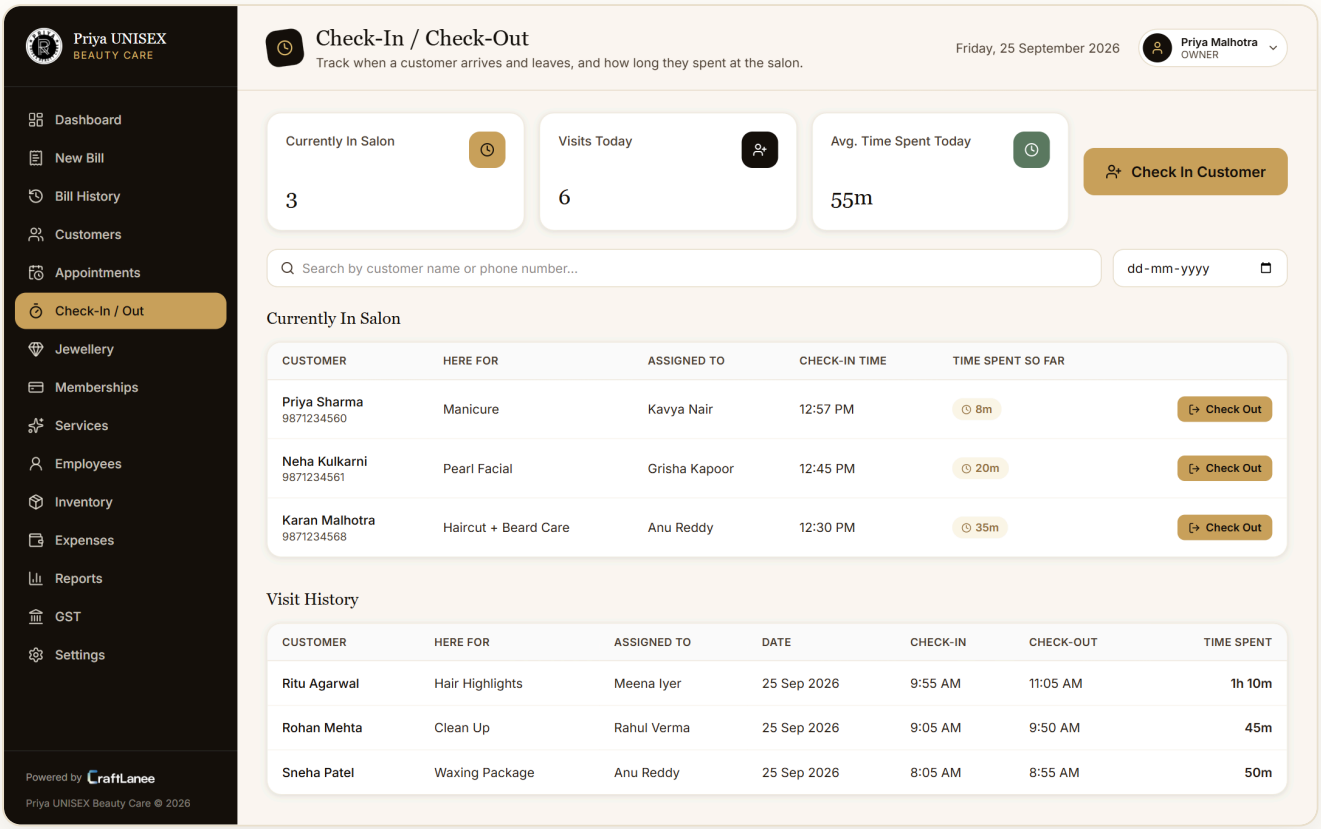

Each customer has one profile that builds up automatically from their bills. The team can see how often someone visits, what they spend and which services they prefer.

> **Prepaid wallet built in.** Top up a customer's balance, spend it on future bills and see every purchase, top-up and usage with before and after balances.

- Fast search by name or phone, with member badges in the list
- Total visits, total spent and last visit on every profile
- Start a new bill for the customer in one tap
- Export the customer list to Excel
- Only the owner can delete a customer

02 · FRONT DESK

Check-in & appointments

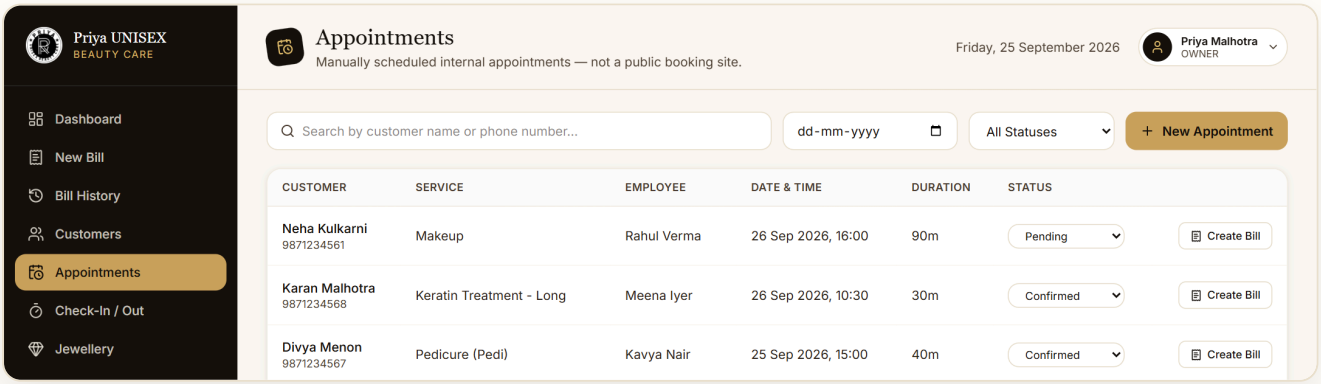

▲ Live view of who is in the salon, who is serving them and how long they have been there, plus a full visit history.

Customer check-in / check-out

Log when a customer arrives, why they came and who is serving them. When they leave, the time spent is recorded automatically. This gives the owner real data on waiting times and how busy the salon is.

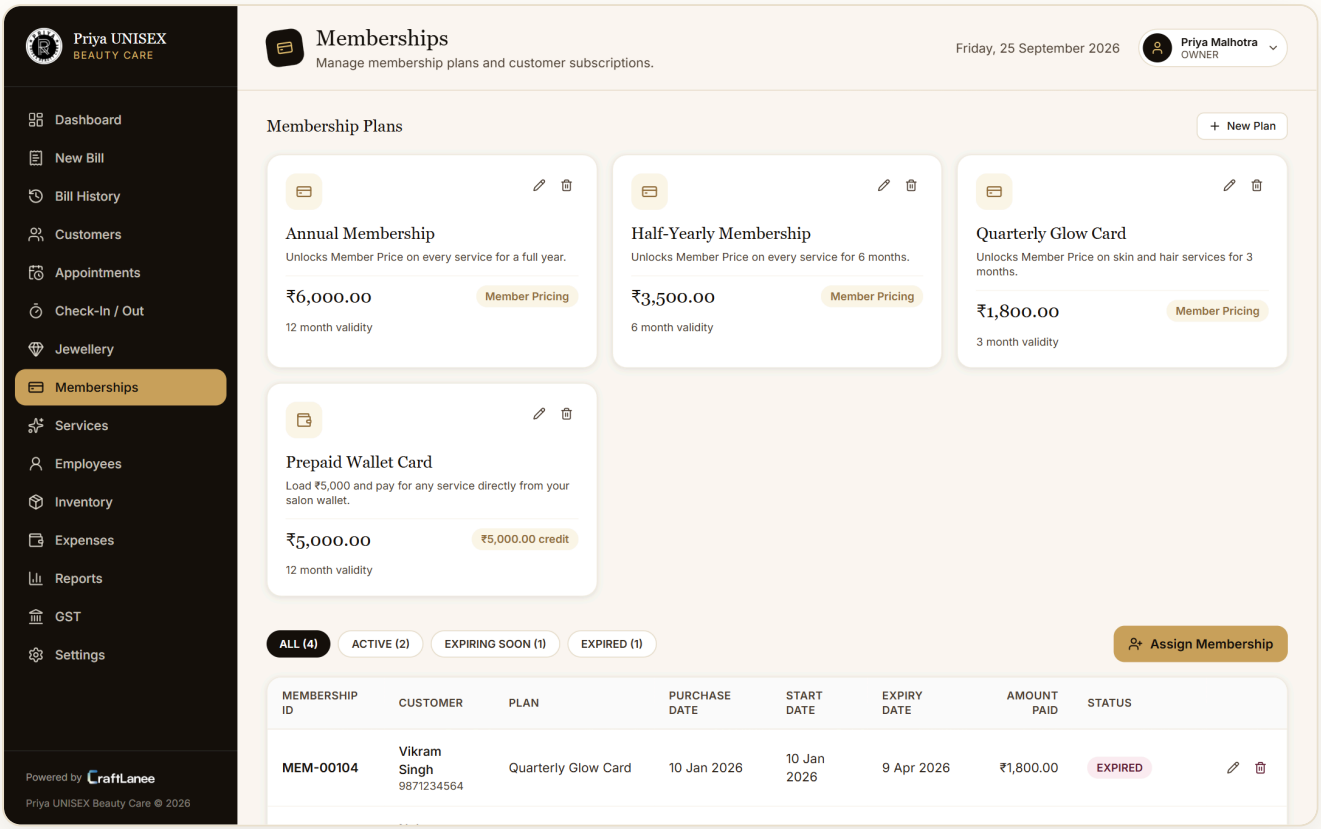

Internal appointments

Book customers by service, stylist, date and time, and track them as pending, confirmed, completed, cancelled or no-show. A confirmed appointment turns into a pre-filled bill with one click.

03 · BUSINESS OPERATIONS

Memberships & service catalogue

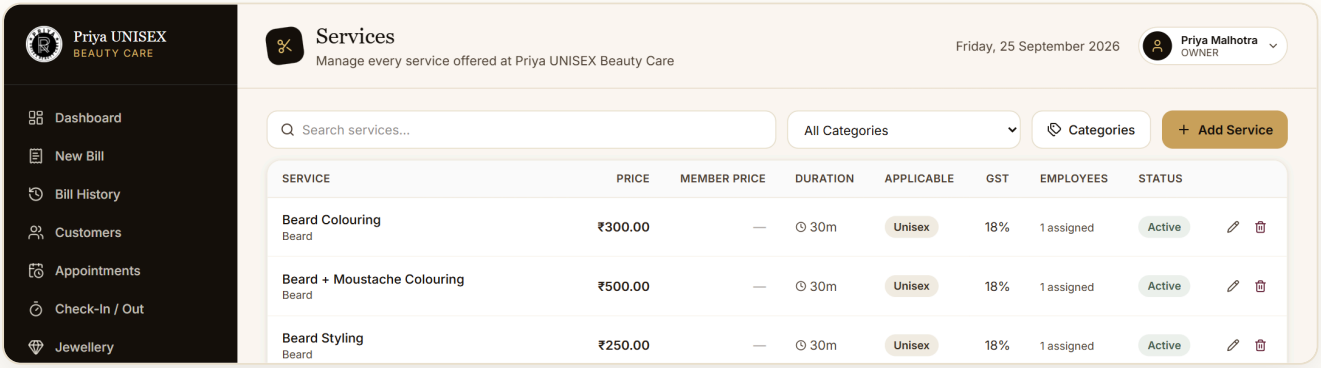

▲ Membership plans (discount cards and prepaid wallet cards) with active, expiring and expired members.

Two kinds of membership

Discount cards unlock a member price that the owner sets for each service. **Wallet cards** hold a prepaid balance. The system never lets a wallet go below zero or be used after it expires. Staff can assign plans, but only the owner can create or change them.

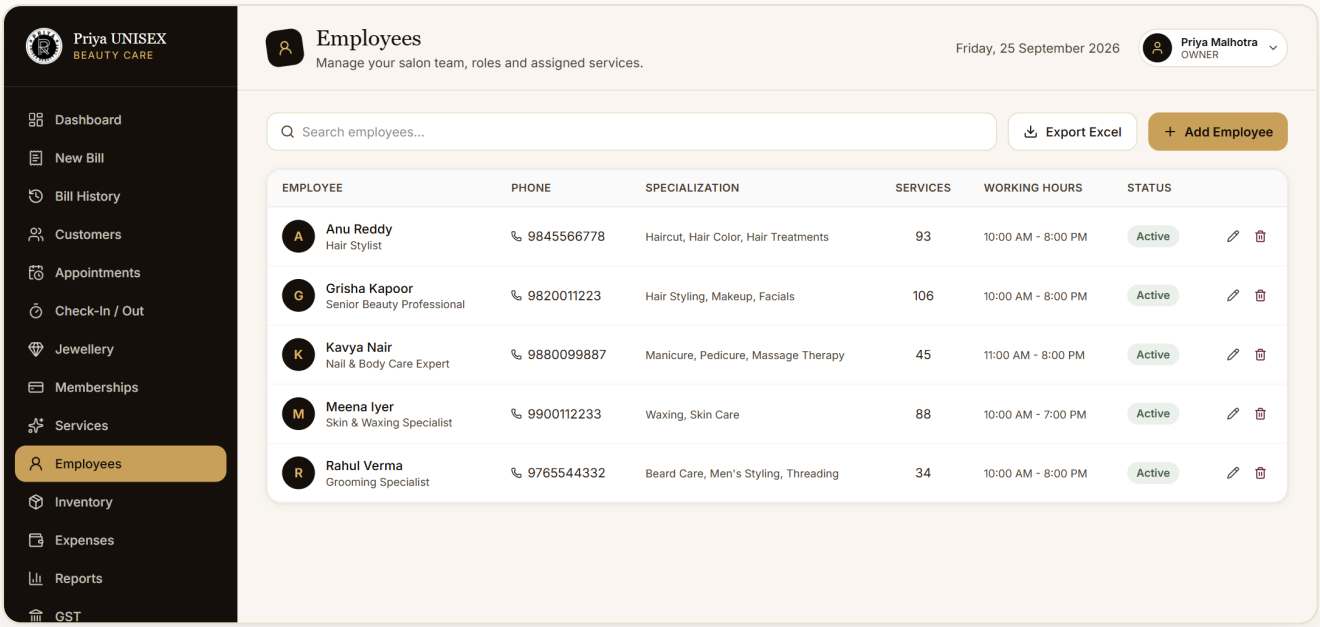

A real service catalogue

The salon's full menu is loaded: hair, skin and facials, waxing, nails, massage, grooming and makeup. Each service has a price, member price, duration, gender, GST rate and assigned stylists, and can be switched on or off.

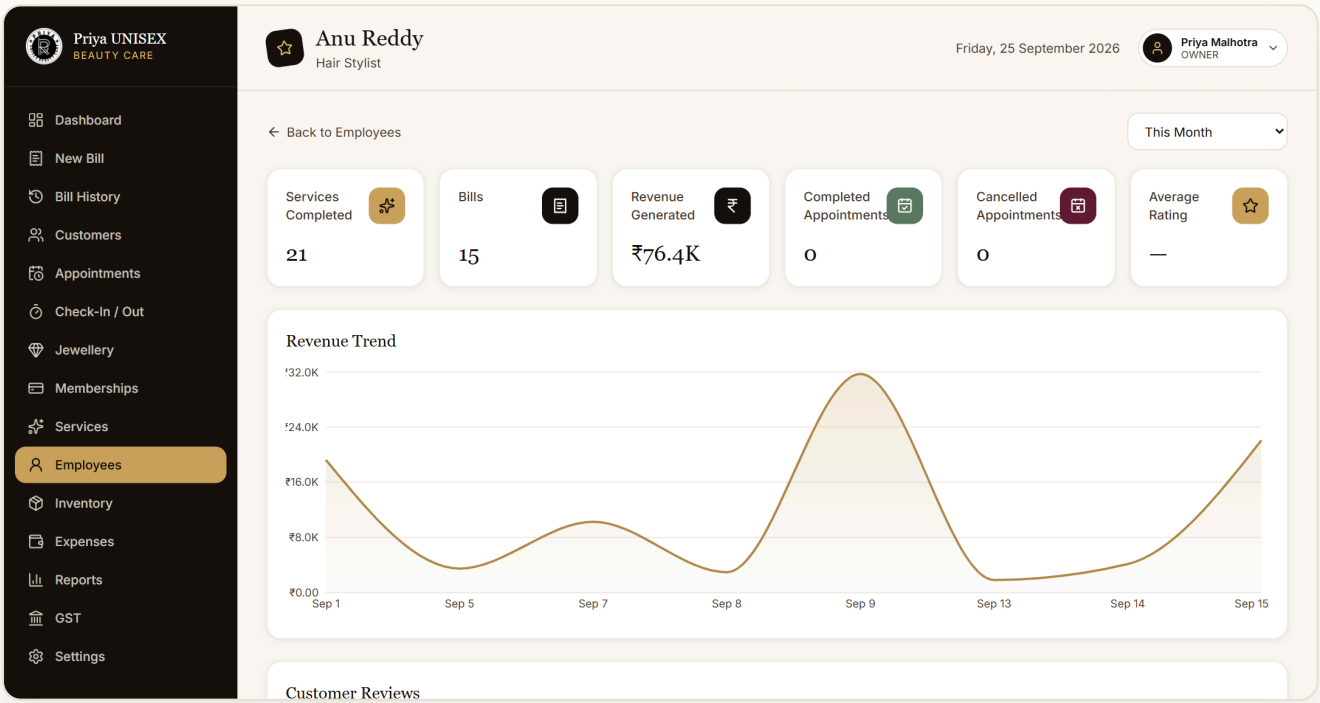

03 · BUSINESS OPERATIONS

Employees & performance OWNER

▲ Staff directory with specialisation, services delivered, working hours and status.

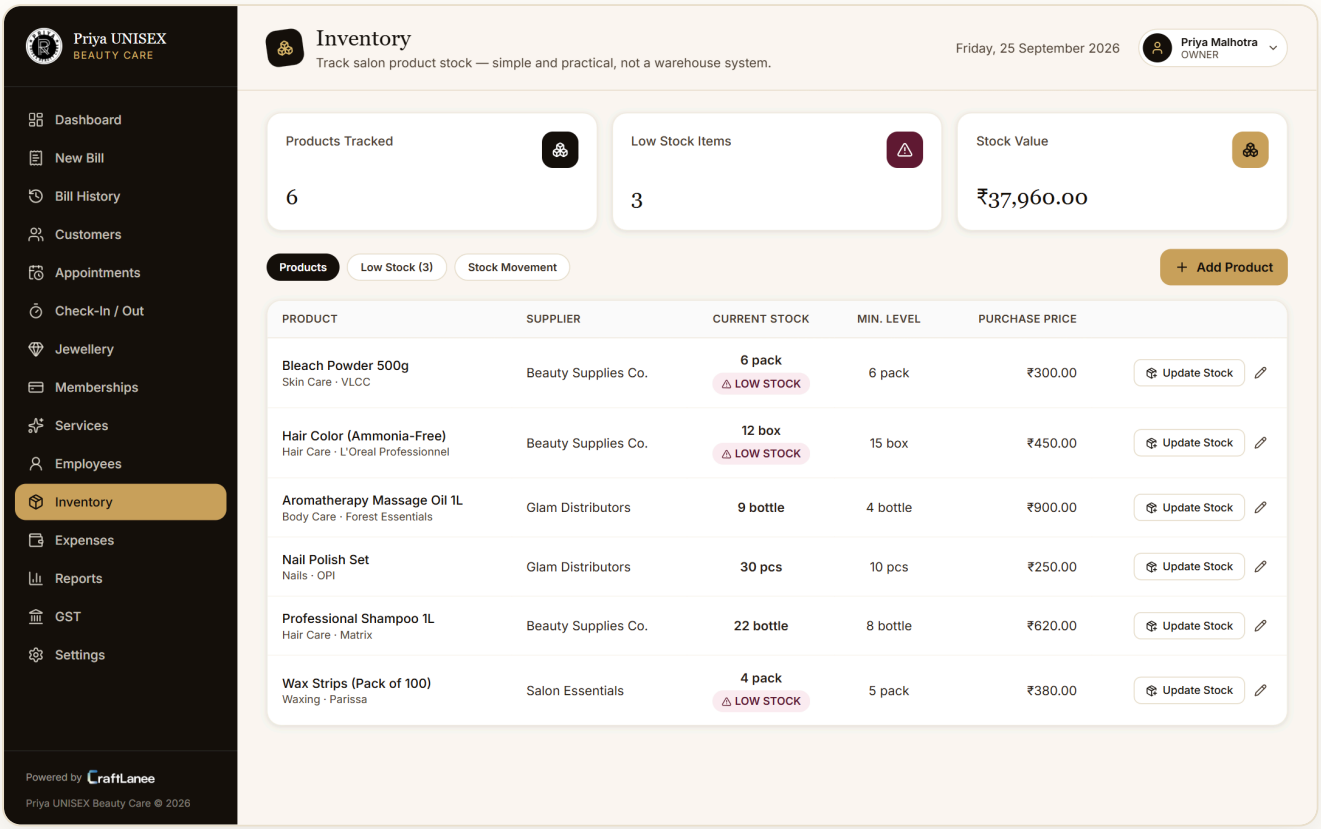

▲ Performance for each employee: services completed, bills, revenue generated and a revenue trend for any date range.

Fair and accurate credit. Revenue is credited to whoever performed each service on a bill, not to whoever typed it in. A multi-stylist visit is split correctly across the team.

03 · BUSINESS OPERATIONS

Inventory & expenses OWNER

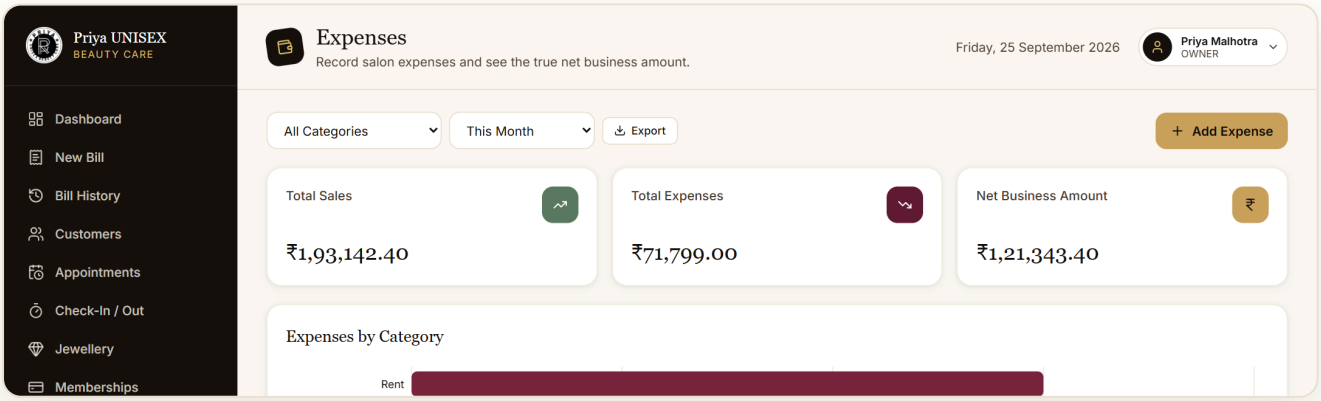

▲ Product stock with supplier, current level, minimum level and low-stock warnings.

Simple, honest stock tracking

Add, remove or adjust stock. Every change is saved in a movement log, so the current count can always be traced back. Products that fall below their minimum level are flagged on the dashboard.

Expenses & real profit

Record rent, salaries, product purchases, marketing and more across 10 categories. The system then shows **Total Sales – Total Expenses = Net Business Amount** for any period.

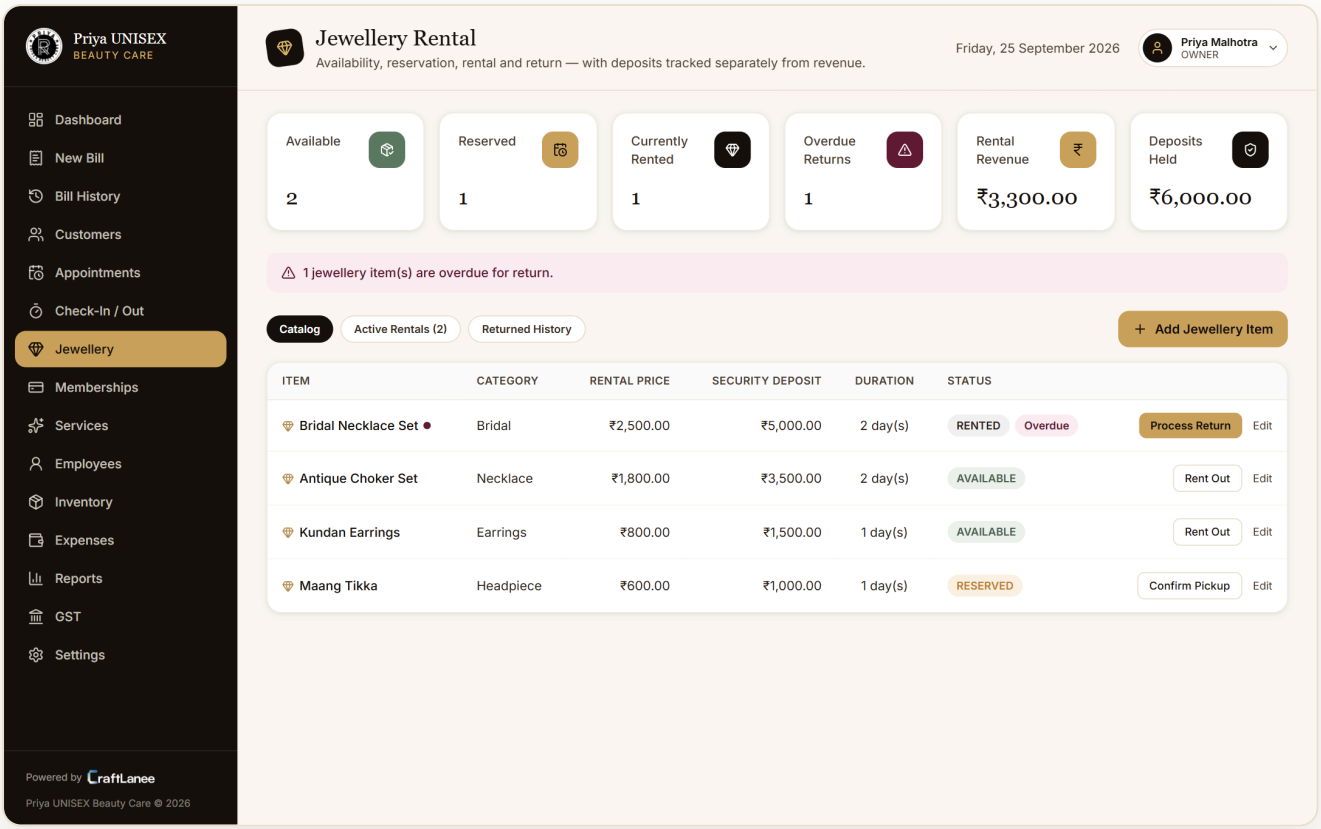

03 · BUSINESS OPERATIONS

Jewellery rental

OWNER + STAFF

H

▲ Catalogue with rental price, security deposit, duration and live status, plus overdue alerts.

Many salons rent bridal and party jewellery alongside makeup. This module covers the full process so nothing is lost and every deposit is accounted for.

> **Deposits are never counted as revenue.** Damage charges and penalties come out of the security deposit only. Rental income and deposits held are reported separately.

Catalogue

Items with rental price, deposit and duration

Reserve → Rent out

Reserve ahead, then confirm pickup

Return & refund

Deduct any damage and refund the rest of the deposit

Available again

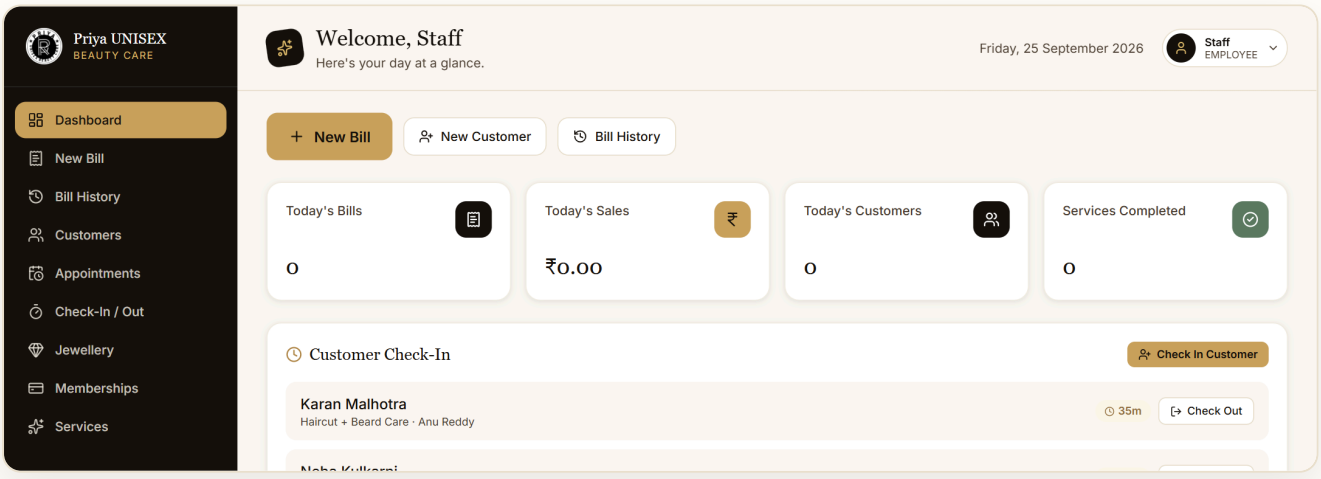

The item goes back into the catalogue automatically

04 · INSIGHTS & COMPLIANCE

Dashboards for each role

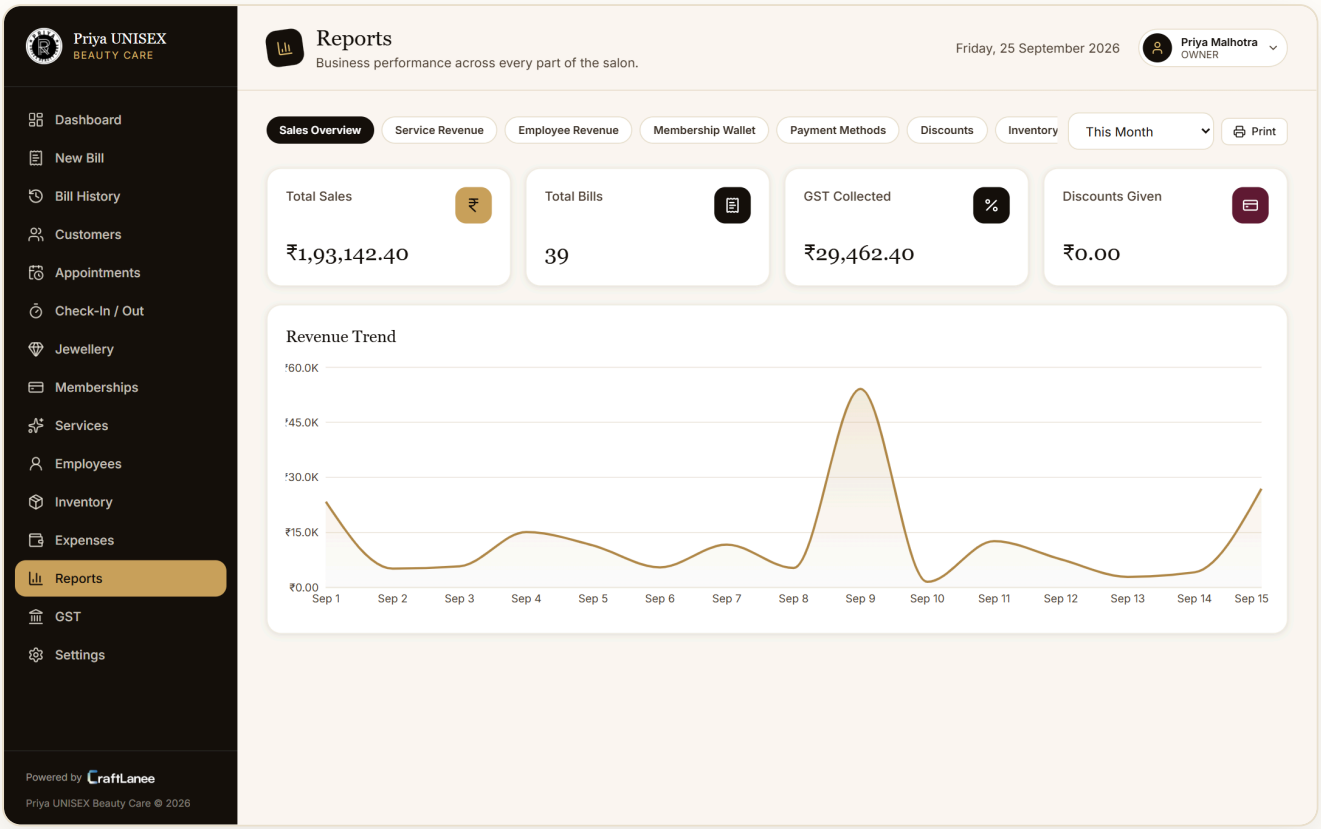

▲ Owner view: today's revenue, bills, pending payments, GST, memberships, a business health summary, a 30-day revenue trend and payment mix.

▲ Staff view: shortcuts for today's work and a check-in panel showing who is in the salon right now.

04 · INSIGHTS & COMPLIANCE

Reports & GST OWNER

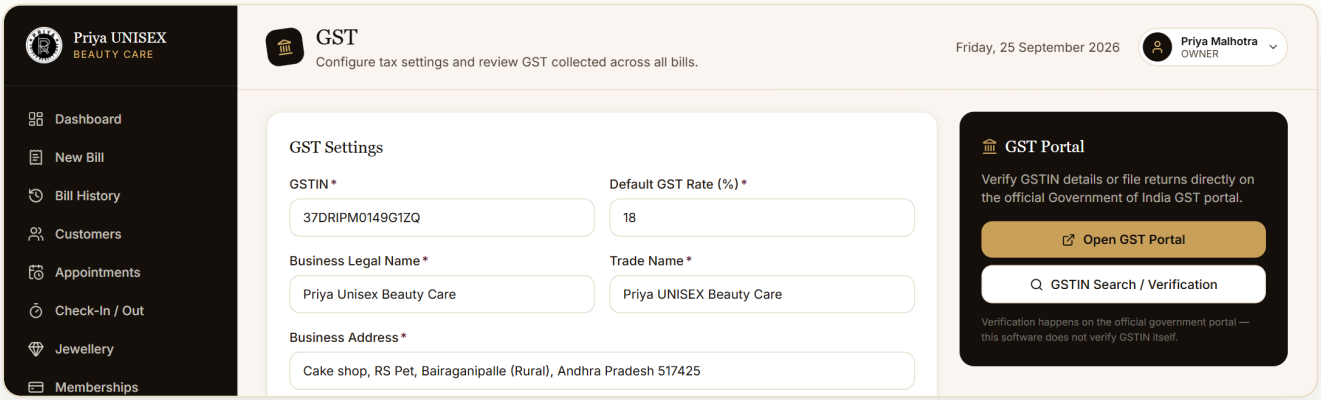

▲ Nine report types: sales, service revenue, employee revenue, membership wallets, payment methods, discounts, inventory, expenses, and jewellery & deposits.

Reports you can act on

Every report can be filtered by date range. Each one can be printed or exported to CSV for your accountant. Staff see a simpler "My Performance" view.

GST made simple

Store your GSTIN, legal name, state code and invoice prefix once. Get monthly, quarterly or yearly GST summaries (taxable sales, CGST, SGST/IGST) with direct links to the official GST portal.

05 · TECHNOLOGY & SECURITY

Modern, fast and secure by design

A lightweight but real client–server setup. It is fast on a single counter computer, needs no expensive database server, and is ready to grow.

FRONT END

Web app

- React 19 + TypeScript
- Tailwind CSS design system
- Recharts dashboards
- PDF invoices & sharing

⇄ REST API

BACK END

API server

- Node.js + Express
- JWT sign-in sessions
- Role checks on every call
- Encrypted passwords

⇄ SQL

DATA

Database

- SQLite, no separate DB server
- Easy backup: one file
- Full audit trails for stock & wallets

Security

Passwords are stored as bcrypt hashes and sessions expire automatically. Access rules are enforced on the server, and deleting records is restricted to the owner.

One source of truth for money

A single calculation handles subtotal, discount, tax and total for the POS screen, saved bills and reports. The numbers always match.

Traceable records

Voided bills and expenses are marked, not erased. Every stock movement and wallet transaction keeps its before and after values.

Fully brandable

Salon name, logo, address, tagline, invoice footer, currency and tax settings are all changed from the Settings screen, with no code changes needed.

Frontend	React 19 · TypeScript · Vite · React Router 7 · Tailwind CSS 4 · Recharts · jsPDF · lucide icons
Backend	Node.js · Express · TypeScript · JSON Web Tokens · bcrypt
Database	SQLite (built into Node.js, so no extra installation)
Access	Any modern browser on desktop, laptop or tablet

CraftLanee

YOUR BUSINESS, YOUR SYSTEM

Want something like this for *your* business?

We can adapt this platform for salons, spas, clinics and other service businesses, or build a custom system around the way you work.

Your branding

Your logo, colours, invoice layout and business details from day one.

Your services & pricing

We load your full service menu, member prices and tax settings for you.

Modules you need

Turn modules on or off, or add new ones such as online booking, SMS reminders or multi-branch support.

Setup & support

Installation, staff training and ongoing support so your team is confident from the first bill.
